##### 2.7.1 General Rural Commercial and Industrial Uses Goals

The following goals relate to Rural Commercial and Industrial Uses:

- a) To permit existing commercial-related uses and existing industrial uses to continue in areas outside of designated settlement areas;

When considering expansions to existing Rural Commercial and Industrial Uses, the following policies shall apply:

- a) Proposed uses shall meet requirements, and obtain necessary approvals, with respect to water supply, waste water disposal and solid waste

disposal. Certain uses or expansions to existing uses may be restricted as a result of their servicing requirements.

As an interim measure and where environmental conditions permit, rural industrial uses which are "dry" in nature may be considered where municipal services are not provided, or where municipal water services only are provided. Such "dry" rural industrial uses shall not require large volumes of water or generate large volumes of effluent. Effluent generated shall be from domestic sources only and not as a result of any industrial processes. If full municipal services are ultimately provided, industrial uses which are not "dry" in nature may be considered without amendments to this Plan.
- j) Industrial uses shall be limited to dry industrial uses (as defined in Section 11), including manufacturing, processing, assembling, wholesaling, warehousing, distributing, repair, servicing and storage of goods and

materials. Uses accessory to industrial operations such as offices and factory retail outlets accessory and subordinate to an industrial use are also permitted. Research facilities, public facilities and recycling operations are also permitted.

- k) Commercial uses shall be limited to those uses which exhibit a strong orientation to vehicular traffic and single purpose shopping trips, or commercial uses which by nature of the size of product sold, require large selling areas. Without limiting the generality of the foregoing, such uses shall include commercial establishments which are oriented to vehicular traffic such as automobile sales establishments, automobile service stations and gas bars, public garages, building supply outlets or lumber yards, motels and accessory restaurants, farm machinery and equipment sales and service, farm supplies, and drive in restaurants.”
