

January 24, 2024

Your Worship and Members of Council,

I am writing to inform you of our concerns with the [Ontario Energy Board's \(OEB\) decision on Phase 1 of the Enbridge Gas 2024 rebasing application](#), issued on December 21, 2023. The disappointing decision puts future access to natural gas in doubt and sets a deliberate course to eliminate natural gas from Ontario's energy mix. This decision is about the millions of Ontarians who rely on natural gas to keep their homes warm, and the many businesses throughout Ontario who depend on natural gas for day-to-day operation.

Our 2024 rate rebasing application was designed to provide our customers with safe and reliable natural gas at a reasonable cost, in addition to measured steps to help Ontario advance a practical transition to a sustainable energy future. Natural gas plays a critical role in Ontario's energy evolution mix while supporting the reliability of Ontario's electricity system. Natural gas meets 30 percent of Ontario's energy needs, which can not be easily or quickly replaced.

We are taking action to secure the future of natural gas in your communities. We are filing a motion in late January to review evidence with the OEB and seeking a judicial review of this decision.

Without natural gas, communities across Ontario will feel the impacts of this decision in their everyday lives – the stakes are high.

- **Energy Affordability:** Those looking to connect to natural gas will be required to pay an upfront fee, which creates a significant financial barrier to all forms of residential and commercial development. This resulting fee adds thousands of dollars to individual consumers' cost to obtain or expand gas service.
- **Economic Growth:** This decision will put economic developments in your community at risk. The decision limits the ability of future expansion projects to support regional investment to meet the ever-growing energy needs in your community and communities across Ontario. That includes greenhouses, grain dryers, industrial parks, and any new businesses or housing developments seeking access to natural gas.
- **Energy Access:** Preserving customer choice is critical. Constraining access to natural gas through a reduction in capital will significantly limit the future development of essential energy infrastructure vital to moving manufacturing, agriculture, and the consumer goods industry in Ontario.
- **Energy Security:** On an annual basis, natural gas delivers twice the energy to Ontario than electricity, and five times the maximum peak capacity of Ontario's electricity grid at a quarter of the cost. Even in the worst weather conditions, our reliable natural gas system delivers.

As local leaders across the province, your voice matters, and we encourage you to take action.

Reach out to your MPP to share your support for the government's [quick action](#) and write the OEB about the consequences of reduced access to the natural gas grid to support economic development, housing growth, energy reliability. Use your voice to acknowledge the need for natural gas and infrastructure in Ontario today and into the future while we take a measured step towards energy transition.

We ask that you reach out to your municipal advisor or find us at municipalaffairs@enbridge.com to get started.

Sincerely,

Michele Harradence
President
Enbridge Gas Inc.
