Re: Site Servicing Design Brief for Draft Plan Application for Brock Development Group
Proposed 19 Residential Lot Development, Medway Road, Ballymote, Ontario

1. INTRODUCTION

This Site Servicing Memorandum (Memo) has been prepared by Strik, Baldinelli, Moniz Ltd (SBM) to address the comments from the Middlesex County, received via email, dated April 26, 2023, as well as subsequent communications and conversations with Brock Development for the proposed development of 19 residential lots at Highbury Avenue North and Medway Road, Ballymote, Ontario.

The site is bordered by general agricultural zones to its east and south, Hamlet Residential First Density zones across the Highbury Avenue North Right-of-Way (ROW) to the west and the Medway Road ROW to the north. This Memo is to determine the adequacy of the existing municipal services in support of Zoning By-law Amendment (ZBA) applications for the proposed lot severance.

2. SANITARY SERVICING CONSIDERATIONS

As per the Ballymote Waterworks Highbury Avenue as-constructed drawings provided by the Municipality, Project No. 92037 sheets 1, 2, 6, and 7, all dated April 15, 1994, provided in Appendix A, the proposed development is not tributary to a sanitary sewer. There are no existing sanitary sewers on Highbury Avenue North ROW or Medway Road ROW and therefore, on-site septic systems are proposed.

The dimensions of the on-site septic system and contingency area are obtained from the Soil Report for Wastewater Servicing by BOS Engineering & Environmental Services Inc., dated June 2, 2021 and updated October 22, 2022, provided in Appendix B. The system is schematically shown on Engineering Plans, sheets 2A and 2B provided separately.

To address the sanitary servicing comment regarding Lot 17, septic system and contingency area for Lot 17 is obtained from the Site, General Grading & Servicing Plan by BOS Engineering & Environmental Services Inc., project number 21019-01, sheet S-1, dated September 9, 2021, received September 10, 2021.

3. STORMWATER MANAGEMENT

Pre-development conditions were obtained from the Topographical Plan of Survey by Callon Dietz Incorporated, File No. 20-23779 A, dated February 17, 2021, provided in Appendix C. Grade elevations around the proposed lots are to match existing grades and all lots are graded to generally match the existing drainage patterns. Please see the existing and proposed overflow routes (OFR) shown on Engineering Plans, sheets 2A and 2B provided separately for reference.

As per the Ballymote East Drain Plan & Profile prepared by A. M. Spriet & Associates Ltd. Consulting Engineers, dated October 16, 1971, provided in Appendix C, the site drains to the Ballymote East Drain 1971. Therefore, a soak-away pit is proposed on each property to provide storm water management (SWM) storage and to infiltrate water to help the site achieve a water balance. It is noted that each infiltration trench will be connected to a trench drain near the property line which will collect flows from the driveway and will also act as an overflow point when inflows exceed the capacity of the soak-away pit.

In addition to the overflow point located at the trench drain, an overflow pipe is to also be provided from the roof leader that discharges to a splash pad. A removable filter is incorporated into the roof leader below the overflow pipe. Please refer to Figure 4.3: Roof Leader Discharge to Soak-away Pit in Section 4.5.6 of the Ministry of Environment, Conservation and Parks (MECP) Stormwater Management Planning and Design Manual for details of this system. The overflows from both locations are directed to the municipal drain flowing along the Medway Road ROW and to the Ballymote East Drain generally matching existing drainage patterns.

As per comment 2 regarding infiltration galleries (soak-away pit) received from Middlesex County dated September 23, 2022, the hydraulic conductivity of soil per the Infiltration Assessment prepared by Englobe, dated November 16, 2022, provided in Appendix C, was initially used and incorporated safety factors as identified in Appendix C - Tables C1 and C2 of Credit Valley Conservation Authority's Low Impact Development Stormwater Management Planning and Design Guide. Per subsequent comments from the Municipality requesting in-situ testing to determine the infiltration rates, LDS Consultants were retained and prepared a Soil Infiltration Testing Report dated August 23, 2023 which can be found in Appendix C. The Soil Infiltration Testing report shows the measured infiltration rates at three test pit locations corresponding to the three clusters of proposed lots along Medway Road and Highbury Ave. LDS also provided the infiltration rates (using a 2.5 factor of safety per the TRCA/CVC Low Impact Development Stormwater Management Planning and Design Guide) for the noted three test pit locations. The factored infiltration rates for the three test pit locations range between 1.9mm/hr to 2.1 mm/hr. The LDS report notes that each test hole was advanced to a depth of approximately 1.2m below existing grade and the observed soils were comprised of 300mm of topsoil underlain by silt which extended to termination depth. The silt was described as brown with trace gravel and trace to some clay, and in a moist and compact state.

As per section 4.5.6 of the MECP Stormwater Management Planning and Design Manual, a minimum infiltration rate of 15 mm/hr is required. As neither the in-situ or factored infiltration rates provided by LDS meet this minimum requirement, SBM does not recommend using soak-away pits as an effective method for stormwater management. Therefore, as the expected infiltration rates are low and as discussed above, SBM has provided multiple overflow outlets from the soak-away pit.

For visual clarity, on Engineering Plans, sheets 2A and 2B provided separately, one catchment area marker per lot is shown which represents the total area and runoff coefficient (C-value) of the lot. The calculation and design of the soak-away pit for the lots are completed using only the controlled area (i.e.. the area's tributary to the soak-away pit) as the uncontrolled areas are made up of landscaped area and generally match the pre-development conditions. The resulting assumption is that the peak flow rates from the post-developed uncontrolled areas within each lot would match the peak flow rates from the same associated areas under the pre-development conditions. Calculations of controlled areas for each lot are included in the SWM calculations, provided in Appendix C.

The time of concentration used in the pre-development and post-development SWM calculations is derived from Figure 4.3 Average Runoff Coefficient to Time of Concentration provided within the Middlesex Center Infrastructure designs standards. It is noted that a design porosity (commonly referred to as void ratio) of 0.35 was used for the purposes of the soak-away pit design.

The runoff from each lot's roof and driveway is controlled and directed to each lot's soak-away pit with some lots containing minor landscaped areas which are also tributary to the trench drain and soak-away pit. The remainder of the site area is uncontrolled landscaped area and is graded to generally match pre-development conditions. Therefore, the development will not negatively impact the adjacent farmland. Please refer to the SWM calculations provided in Appendix C which demonstrates how the post-development flows will be controlled to meet pre-development levels, and Engineering Drawings sheets 2A and 2B, which show the lot grading and catchment areas.

For each lot, the pre-development area equivalent to the sum of all controlled areas in the post-development areas are used to compare the runoff and calculate the required storage during 5-year and 100-year storm events. As per the comment received from the Municipality of Middlesex Centre, sizing is completed based on only the contact area at the bottom of the soak-away pit. Please refer to the SWM calculations provided in Appendix C for details. Please also see the below pre to post SWM Summary tables which are also included in the SWM calculations provided in Appendix C. It is noted that each soak-away pit is sized with approximately 16m^3 of storage which is intended to satisfy the constraints of providing adequate storage to store flows to meet the allowable post-development outflow rate, and to provide enough bottom face surface area to allow for a drawdown time of less than 48 hours per the MECP Stormwater Management Planning and Design Manual recommendations. It is noted that a draw down time of 24 hours or less cannot be achieved given the limited infiltration rate of the soils and the space constraints of placing a soak-away pit on each lot while managing required setbacks from property line, building envelope, and other utilities including the water service and septic system.

Lots 1 to 5 SWM Summary

RETURN PERIOD OF STORM	PRE-DEVELOPMENT PEAK FLOW (L/s)	POST-DEVELOPMENT		PRE - POST PEAK OUTFLOW TO DOWNSTREAM (L/s)	POST DEVELOPMENT PEAK FLOW TO PRE-DEVELOPMENT PEAK FLOW IN PERCENTILE
		EXFILTRATION RATE (L/s)	PEAK OVERFLOW TO MUNICIPAL DRAIN (L/s)		
5-YEAR	1.92	0.10	0.24	1.68	13%
100-YEAR	3.35	0.10	3.36	-0.01	100%

Lots 6-15 SWM Summary

RETURN PERIOD OF STORM	PRE-DEVELOPMENT PEAK FLOW (L/s)	POST-DEVELOPMENT		PRE - POST PEAK OUTFLOW TO DOWNSTREAM (L/s)	POST DEVELOPMENT PEAK FLOW TO PRE-DEVELOPMENT PEAK FLOW IN PERCENTILE
		EXFILTRATION RATE (L/s)	PEAK OVERFLOW TO MUNICIPAL DRAIN (L/s)		
5-YEAR	1.98	0.09	0.27	1.71	14%
100-YEAR	3.46	0.09	3.47	-0.02	100%

Lot 16 SWM Summary

RETURN PERIOD OF STORM	PRE-DEVELOPMENT PEAK FLOW (L/s)	POST-DEVELOPMENT		PRE - POST PEAK OUTFLOW TO DOWNSTREAM (L/s)	POST DEVELOPMENT PEAK FLOW TO PRE-DEVELOPMENT PEAK FLOW IN PERCENTILE
		EXFILTRATION RATE (L/s)	PEAK OVERFLOW TO MUNICIPAL DRAIN (L/s)		
5-YEAR	1.91	0.10	0.24	1.67	12%
100-YEAR	3.34	0.10	3.32	0.02	99%

Lot 17 SWM Summary

RETURN PERIOD OF STORM	PRE-DEVELOPMENT PEAK FLOW (L/s)	POST-DEVELOPMENT		PRE - POST PEAK OUTFLOW TO DOWNSTREAM (L/s)	POST DEVELOPMENT PEAK FLOW TO PRE-DEVELOPMENT PEAK FLOW IN PERCENTILE
		EXFILTRATION RATE (L/s)	PEAK OVERFLOW TO MUNICIPAL DRAIN (L/s)		
5-YEAR	1.87	0.10	0.23	1.64	12%
100-YEAR	3.27	0.10	3.26	0.01	100%

Lot 19 SWM Summary

RETURN PERIOD OF STORM	PRE-DEVELOPMENT PEAK FLOW (L/s)	POST-DEVELOPMENT		PRE - POST PEAK OUTFLOW TO DOWNSTREAM (L/s)	POST DEVELOPMENT PEAK FLOW TO PRE-DEVELOPMENT PEAK FLOW IN PERCENTILE
		EXFILTRATION RATE (L/s)	PEAK OVERFLOW TO MUNICIPAL DRAIN (L/s)		
5-YEAR	1.91	0.10	0.24	1.67	13%
100-YEAR	3.35	0.10	3.34	0.00	100%

As noted in the above tables, each lot's soak-away pit has been designed to provide enough storage to restrict peak outflows to the Municipal drain and meet peak pre-development flows. As shown in the SWM Calculations provided in Appendix C, each soak-away pit has also been designed to ensure each soak-away pits drawdown time is 48 hours or less. Referring to the Water Balance Calculations provided separately, under post-development conditions, via the use of infiltration trenches and increased depth of topsoil (30cm) within the proposed residential lots, the water balance shows a decrease in overall runoff and evapotranspiration, and an increase in overall infiltration when compared to the pre-development conditions.

The maintenance of the soak-away pit on each property will be the responsibility of each homeowner. A Homeowner Information Package has been developed to explain the importance of the feature and outline the maintenance responsibilities. The package is attached in Appendix E for reference.

It is further noted that the as the existing ditch within the Medway Road and Highbury Ave. right of ways will be affected by the proposed driveway accesses for each lot, driveway culverts are proposed for the affected lots

and are designed to match the existing flow capacity of the ditch and the slopes of the existing ditches are to remain.

4. WATER SERVICING CONSIDERATIONS

4.1 General Consideration

Water service connections are to be sized as per Section 5.9.1 of the Middlesex Centre Infrastructure Design Standards (MCIDS). Water services shall be a minimum of 25 mm (1") internal diameter, equipped with approved corporation stop with tapping sleeves and saddles, and curb stop with a curb box, and shall be installed as per Figure 5.10 Standard Installation of <50mm Water Service Connection and Layout Detail. The corporation stop with tapping sleeve and saddle shall be installed at the watermain, and a curb stop shall be installed 0.3 m from, and on the street side of, the property line as per Figure 5.11. It is noted that the existing well servicing Lot 18 is to be decommissioned, and new water service connection be provided as per the above.

Based on the above criteria, a 25 mm (1") PEX water service connection with tracer wire full length is proposed, connecting to municipal water main with approved service saddles and main stops as per Figure 5.10. As per Table A-7.6.3.1 of the Ontario Building Code 2012 (OBC), 60 m length of this water service connection can serve 57 fixture units, which is a conservative threshold for a single-family residential building. For reference, according to Table 7.4.9.3 of OBC, a single-family dwelling with 3-bathroom groups, a clothes washer, a dishwasher, a floor drain, a laundry tray, and a sink will have 25.5 fixture units.

To address water service comments from the Municipality of Middlesex Centre, where the significant percentage increase to the population of Ballymote is being proposed, five (5) hydrant test results were received from the Municipality and reviewed. As per the test results dated 16-Jun-22, it appears that there is enough capacity in the system to release at least 762 USGPM and up to 976 USGPM (during 20 psi) for the hydrant located on 21604 Highbury Ave. N. The difference is approximately 214 USGPM. The 18 lots are equivalent to population of 54 as calculated per section 5.3 of Municipality of Middlesex Centre – Infrastructure Design Standards. Per the same section, using 350 L/day/cap average day demand and maximum hour and maximum day peaking factors obtained from Table 3-3 of MECP Design Guidelines for Drinking-Water Systems, maximum hourly demand of 50 USGPM is calculated. Since what is required for maximum hourly demand (50 USGPM) is less than the available capacity (214 USPGM) in accordance with the hydrant tests received, we can confirm that there is sufficient pressure in the system to provide water service for the proposed development. Please refer to Domestic Water Demand and Velocity Calculation and Fire Flow Test received from Middlesex Centre attached in Appendix D.

4.2 Fire-fighting Consideration

As per Section 5.8.1 of the MCIDS, the location of hydrants is subject to the requirements and approval of the Municipal Fire Department in accordance with the Ontario Building Code. As a general guide, hydrants must be located not more than 170 m apart along the length of the watermain and should be located at intersections where possible.

There is an existing Municipal fire hydrant across the Medway Road available for Lots 1, 2, 3, 4, and 5. There is also an existing Municipal fire hydrant at southeast side of Medway Road and Highbury Avenue North intersection and at the front of Lot 15. Because the distance between the hydrants appears greater than 170 m on Highbury Avenue North, two new fire hydrants are proposed in front of Lot 9 and Lot 19. The fire hydrants are to be installed as per the MCID Figure 5.8 - Hydrant and Valve Installation. Please refer to Engineering Plans,

sheets 2A and 2B provided separately, for exact location of the proposed fire hydrants and Engineering Plan, sheet 3 provided separately, for the installation detail.

5. LIMITATIONS

This memorandum was prepared by SBM Ltd. for the Municipality of Middlesex Centre and Brock Development Group. Use of this memorandum by any third party, or any reliance upon its findings, is solely the responsibility of that party. SBM Ltd. accepts no responsibility for damages, if any, suffered by a third party as a result of decisions made or actions undertaken as a result of this memorandum. Third party use of this memorandum, without the express written consent of the Consultant, denies any claims, whether in contract, tort, and/or any other cause of action in law, against the Consultant.

All findings and conclusions presented in this memorandum are based on site conditions as they appeared during the period of the investigation. This memorandum is not intended to be exhaustive in scope, or to imply a risk-free facility. It should be recognized that the passage of time may alter the designs, opinions, conclusions, and/or recommendations provided herein.

The design was limited to the documents referenced herein and on the SBM drawings provided separately. SBM Ltd. accepts no responsibility for the accuracy of the information provided by others. All designs, opinions, conclusions, and/or recommendations presented in this memorandum are based on the information available at the time of the review. This document is deemed to be the intellectual property of SBM Ltd. in accordance with Canadian copyright law.

6. CLOSURE

We trust this memorandum meets your satisfaction and current needs. Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,

Strik, Baldinelli, Moniz Ltd.

Table of Contents

1. INTRODUCTION

This report presents the results of a soils and sewage system assessment carried out at Municipal Address: 21488 Highbury Ave in the Municipality of Middlesex Centre, County of Middlesex. The property is described as Concession 6 N Part Lot 8 (Geographic Township of London) and is located in Ballymote. The 35 ha (86.4 ac) parcel is currently vacant. Frontage of all lots are to be onto Medway Road and Highbury Avenue North with 5 lots along Medway Road and 14 lots along Highbury Avenue. Proposed lot depths will be approximately 87m and most narrow lot will be 23.2 m wide. Appendix A contains a map of the site location.

The lots are currently located on farm land. There are not any defined drainage patterns or roadside ditches along Highbury Avenue. A large road side ditch is present along Medway Rd.

The lots are currently proposed to be serviced with onsite wastewater treatment systems and municipal water.

2. EXISTING SURFICIAL SOILS

Soil testing was conducted on November 26, 2020. A map of the site and test pit locations is presented in Appendix A together with soil test pits logs at nine (9) locations across the site.

The test pits were formed to depths of 1.4 to 1.5m. In all cases the underlying soils were comprised of clay to silty clay TILL with estimated soil percolation time in excess of 50 min/cm. Topsoil was generally 25 to 30 cm thick. At five (5) of the test pits there was a thin layer (22 to 46cm thick) of sand to sandy silt at varying shallow depths. Some of these layers (at TP 1 & TP 2) appeared to be pockets since they were water-bearing. The sandy layers were sampled and tested. Grain size analyses and classifications are presented in Appendix B. Assessment of the predominantly heavy soils was made in the field. Approximate soil test locations and test pit logs are presented in Appendix A.

Due to the variable depths and inconsistency of the sandy layers, a percolation time (T) of greater than 50 min/cm is recommended at this site for septic system design.

3. PROPOSED WASTEWATER TREATMENT SYSTEMS

In order to size the proposed wastewater treatment systems, it is necessary to make assumptions regarding the house characteristics. In this case, a daily load of 3000 L/day was assumed in line with actual homes at a similar recent development in Bryanston. This assumed loading can include a 4-bedroom home with 300m2 of living area and up to 40 fixture units as outlined in Appendix E.

Based on the surficial soil as documented in section 2, conventional raised beds were sized requiring a minimum sand footprint of 750 m^2 or 23m wide x 33m deep. Therefore, a conventional raised bed would consume the entire rear yards of the lots. In Middlesex Centre, during lot creation, it is also required to designate an area for a second "contingency bed" for reconstruction in the event of bed failure. The proposed lot sizes are too small to allow this.

Therefore, enhanced pre-treatment (to CAN/BNQ 3680-600 standard) is required, allowing smaller "Type A" beds (approximately 20.5m x 20.4m) as indicated on the sketch in Appendix E. The contingency bed is indicated as a shallow trench system which is allowed by the Ontario Building Code but not recommended at this site.

Since wells are no longer required at this site in lieu of municipal water supplies, the only setback requirement from the water supply line is 2.4m from distribution pipes and tanks. This may require jogging of service lines or location of shut-off valves (curb stops) near the side lot lines. The raised area location and direction of the proposed sand mantle drainage is dependent on both the existing topography and the proposed grading of the lots. There was not a final grading plan available at the time of reporting.

4. SEWAGE IMPACT ASSESSMENT

MOE Procedure D5-4 outlines a multi-step process to gauge the effects of the combined effluent discharges from all of the individual sewage systems in a development based on nitrogen as an indicator of groundwater impact potential.

4.1 Minimum Lot Size

Generally, if the average lot size is smaller than 1.0 ha in size with no lot being smaller than 0.8 ha, then a hydrogeological assessment is not required provided

that the area is not hydrogeologically sensitive. This exemption does not apply to the subject lots as they are to be 0.18 ha in size.

4.2 System Isolation Considerations & Well Records

Where smaller lots than 1.0 ha are proposed, it is necessary to consider the status of isolation of the sewage effluent from the existing or potential supply aquifer. Although the lots will not be serviced with private wells there may be existing residences that do draw groundwater. Hence water well records for the area were reviewed to verify isolation and/or determine potential impacts of the sewage effluent on area wells.

There were 18 valid well records within approximately 500m of the proposed development site, three (3) of which were professionally closed and sealed. Well locations and logs are presented in Appendices C and D, respectively. Following is a summary of the well logs:

Well #	Year Formed	Casing dia(cm)	Water Depth (m)	Pump Rate (lpm)	Soil Profile (m)	Status
4102089	1964	91	7.9	227	**0 – 2.4 Sandy Clay** 2.4 – 7.9 Hard Blue Clay	On highbury adjacent to proposed lots
4102091	1957	15	25.6	1365	0 – 1.3 Topsoil/Fill 1.3 – 2.4 Sand & Clay 2.4 – 22.6 Blue Clay 22.6 – 25.0 Hard Pan 25 .0 - 26.2 Sand & Gravel	
4102092	1962	91	3.1	22.8	0 – 0.30 Topsoil **0.3 – 1.5 Sand** 1.5 – 3.05 Blue Clay	185m west of highbury on medway

7304894	2017	107	3.1		unknown	Closed Sealed

The soil profiles on the well logs are generally consistent with the shallow test pit data. Most non-closed deep wells are to an aquifer ranging from 9.4m to 30.2m in depth. There appears to be a clay overburden with some sand or silt lenses over the deeper aquifer with considerable unlayered clay to prevent migration of wastewater effluent. With the confined aquifer, wastewater effluent is expected to migrate to surface drainage swales and ditches where denitrification will occur.

There are four (4) shallow wells in proximity of the site, namely wells 4102092, 4102096, 4102089, and 4105504. The first two wells are approximately 185 m and 110m respectively west of Highbury Avenue and hence are unlikely to be affected by the development. However, well 4105504 on the Gas station property southeast of the intersection of Highbury and Medway Roads is shallow

and adjacent the development. The status of this well should be examined since there is an existing deeper drilled well on the same property. Well 4102089 is also shallow and immediately adjacent the south end of the proposed development and its status should therefore also be examined. Both of these shallow wells should be decommissioned and replaced, if not done already.

One deep well to the bedrock aquifer was decommissioned due to sulphur content.

Current pump rates for existing deeper wells range from 9 to 46 Litres/minute.

It is conceivable that some of these documented wells are or will be decommissioned in lieu of a new municipal water supply.

5. SUMMARY & RECOMMENDATIONS

To facilitate this development, it is recommended that:

1. Two shallow wells (Well 4105504 and Well 4102089) adjacent the development should be decommissioned (if not done already) and serviced with a replacement water supply, if necessary.

2. Water supply for all of the new lots will be municipal water pipeline. The preferred location of the curb stops is near the side lot lines to avoid interference with minimum setbacks from the contingency septic beds located in the front yards.

3. The proposed development can accommodate peak sewage design loads up to 3000 L/day on each lot as outlined in Appendix E for the lots on both Highbury Avenue and those on Medway Road.

4. Enhanced treatment of sewage (to CAN/BNQ 3680-600 standard) is required to facilitate use of smaller “Type A” distribution beds to fit the proposed lot sizes. These pre-treatment units will also reduce risks of shallow aquifer contamination. The primary “Type A” beds will be located at the rear of all properties, with orientation dependent on existing topography and proposed final grading.

5. The Ontario Building Code does apply to the sewage system construction. The proposed sewage systems will be required to meet all regulations and required setbacks from wells, structures and lot lines outlined in Part 8 of the Ontario Building Code and CAN/BNQ 3680-600 standard.

6. Building permits will require lot grading plans and specific septic system designs for the individual lot developments.

Wastewater Treatment System Assumptions & Sizing

TYPICAL WASTEWATER TREATMENT SYSTEM ASSUMPTIONS AND SIZING FOR MOST NARROW PROPOSED LOT

MIDDLESEX CENTRE REQUIRES SUFFICIENT SPACE FOR A CONTINGENCY BED DURING LOT CREATION.
HENCE, TERTIARY PRETREATMENT SYSTEMS ARE REQUIRED FOR PROPOSED LOT SIZES.
ALTHOUGH PERMITTED BY THE ONTARIO BUILDING CODE, SHALLOW TRENCH SYSTEMS ARE NOT RECOMMENDED AT THIS SITE.

ASSUMED HOUSE CHARACTERISTICS

FIXTURE UNITS - SUMMARY

ITEM	No.	LOAD	TOTAL
1.FULL BATHROOM	4	6	24
INDIVIDUAL ITEMS :			
2. ANY TYPE OF BATH	2	1.5	3.0
3. FLUSH TANK TOILETS	1	4	4
4a.SHOWER(1 HEAD)	0	1.5	0
4b.SHOWER(3 HEAD)	0	4.5	0

NO. OF BEDROOMS:		4	
TOTAL LIVING AREA:		300 m²	

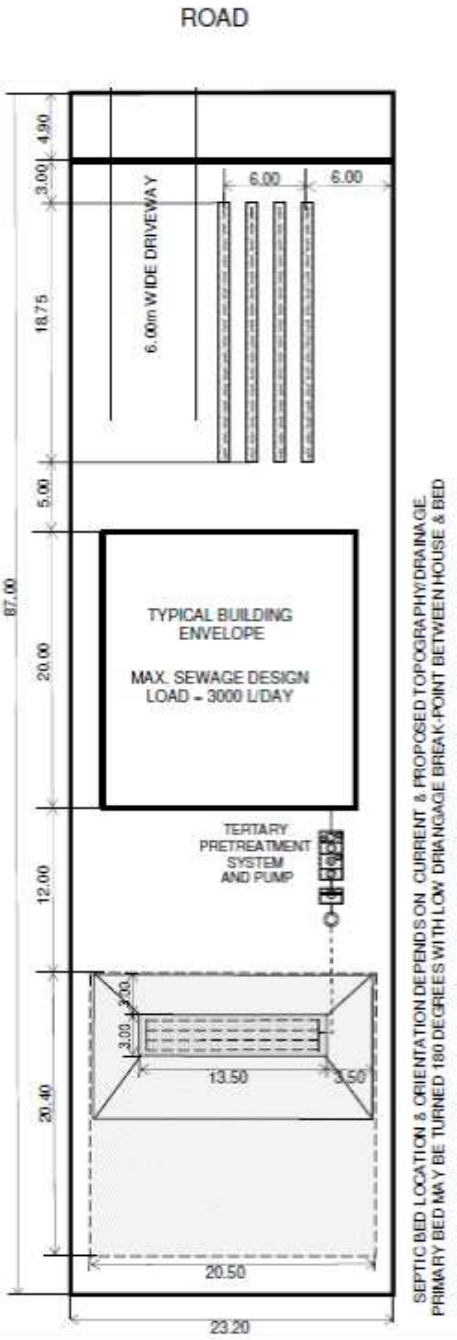
WASTE SYSTEM - DESIGN CAPACITY

BASE LOAD (4 BEDROOM):	2000
1. F. U. OPTION (40 - 20) X 50 :	1000
2. L. A. OPTION (300- 200)/10 X 100:	1000
ADD HIGHER OF ITEM 1 OR 2	
DESIGN LOAD	**= 3000 L/DAY**

CAN/BNQ 3680-600 TYPE "A" BED SEPTIC SYSTEM DESIGN CALCULATIONS AND DIMENSIONS

1. DESIGN LOAD = 3000 L/DAY (SEE "DESIGN CAPACITY")
2. TERTIARY PRETREATMENT UNIT REQUIRED.
3. MIN. STONE BED AREA = 3000 / 75 = 40.0 m²
   SPECIFIED: 13.50 X 3.00 = 40.5 m²
4. DISTRIBUTION PIPE: 4 RUNS EACH 12.3 m LONG @ 67cm ON CENTRES; ALL PIPES 60 cm FROM EDGES OF STONE.
5. MIN. TOTAL SAND CONTACT AREA = QT/400 =375 m²
   TOTAL SPECIFIED AREA INCL MANTLE = 28.90 X 13.50 = 390m²
6. IMPORTED SAND : T = 6 to 8 min/cm

SHALLOW BURIED TRENCH SYSTEM
(FOR CONTINGENCY ONLY – not to be installed)
L = 3000/40 = 75m
USE 4 RUNS OF 18.75m @ 2.0m ON CENTRES



TYPICAL WASTEWATER TREATMENT SYSTEM ASSUMPTIONS AND SIZING FOR MOST NARROW PROPOSED LOT

MIDDLESEX CENTRE REQUIRES SUFFICIENT SPACE FOR A CONTINGENCY BED DURING LOT CREATION.
HENCE. PRIMARY BED IS A CONVENTIONAL RASIED FILTER BED WHILE CONTINGENCY SHALLOW TRENCH SYSTEM IWILL REQUIRE A TERTIARY PRETREATMENT SYSTEM.
ALTHOUGH PERMITTED BY THE ONTARIO BUILDING CODE, SHALLOW TRENCH SYSTEMS ARE NOT RECOMMENDED AT THIS SITE.

ASSUMED HOUSE CHARACTERISTICS

FIXTURE UNITS - SUMMARY

ITEM	No.	LOAD	TOTAL
1.FULL BATHROOM	2	6	12

Subject: **Infiltration Assessment**
21488 Highbury Avenue, Middlesex Centre, Ontario

Englobe Corp. is pleased to submit this letter which provides the results of a review of particle size distribution analyses provided by the client for samples taken from the above noted site. It is understood that the samples were collected from the above-referenced property; to assist with the design of septic tile beds.

The results of the particle size distribution analyses of the main soil unit consisting of silty clay indicate hydraulic conductivities of less than 1 x 10^{-6} cm/sec, corresponding to a factored infiltration rate of less than 5 mm/hr.

The estimated infiltration rate is based on recommendations found in "Low Impact Development Stormwater Management Planning and Design Guide, Appendix C" published by the Toronto and Region Conservation Authority (TRCA) and the Credit Valley Conservation Authority (CVC), and the approximate relationship between hydraulic conductivity and infiltration rate.

Additional in-situ infiltration testing is not recommended as it is Englobe's opinion that minimal additional information will be collected beyond the current level with such tests due to the very low hydraulic conductivity of the silty clay subsoil.

We trust that this letter is suitable for your present requirements. If you have any questions, please do not hesitate to contact our office.
Yours very truly,

Englobe Corp.

Re: Geotechnical Consultation – Soil Infiltration Testing
33418 Highbury Avenue, Ballymote

LDS Consultants Inc. (LDS) has been retained to provide geotechnical services for the proposed development located at 33418 Highhbury Avenue North, in Ballymote. The proposed development plan includes the construction of 19 residential dwellings situated along the East side of Hihgbury Avenue North and the South side of Medway Road. It is understood that as part of the stormwater management strategy roof leader discharge is to be directed toward soakaway pits constructed on each of the proposed lots. To support this approach the municipality has requested in-situ infiltration testing at the site.

Physiographic mapping for Southwestern Ontario (Chapman, L.J. and Putnam, D.F. 2007. Physiography of the Southwester Portion of Southern Ontario; Ontario Geological Survey, Miscellaneous Release - Data 228), identifies that the site is located within the Physiographic Region known as the Stratford Till Plain, with soils expected to be predominantly comprised of silty clay with some surficial silt and sand deposits.

On August 10, 2023, LDS visited the site for the purpose of reviewing the site conditions and to advance three test pits to conduct in-situ infiltration testing. The location of the test holes are shown on the appended site plan. Each test hole was advanced to a depth of approximately 1.2 m below existing grade, by an local excavation contractor provided by the client. The soils observed in the test holes were comprised of surficial topsoil (approximately 300 mm in thickness), underlain by silt which extended to termination depth. The silt was described as brown, with trace gravel and trace to some clay, in a moist and compact state.

At termination depth within each test pit, LDS conducted an in-situ infiltration test, the results are summarized below:

Location	Measured Infiltration Rate mm/hr	Factored Infiltration Rate mm/hr
Test Pit 1 Silt, trace to some clay 1.2 m depth	4.7 mm/hr	1.9 mm/hr
Test Pit 2 Silt, trace to some clay 1.2 m depth	5.2 mm/hr	2.1 mm/hr
Test Pit 3 Silt, trace to some clay 1.2 m depth	4.5 mm/hr	1.8 mm/hr

The above factored infiltration rates were calculated using correlation from TRCA/CVC Low Impact Development Stormwater Management Planning and Design Guide protocol which references Ontario Ministry of Municipal Affairs and Housing (OMMAH). 1997. Supplementary Guidelines to the Ontario Building Code 1997. SG-6 Percolation Time and Soil Descriptions. Toronto, Ontario. A Factor of Safety of 2.5 has been applied in determining the factored infiltration rate.

We trust this satisfies your present requirements.

APPENDIX E

Homeowner Information Package

Stormwater Infiltration Trench

Homeowners' Information Package

All drainage from your lot makes its way to the Thames River through groundwater, a system of front yard storm water infiltration soakaway pits, front, side and rear yard swales and ditches, and nearby open watercourses. Your lot has been Engineered to retain natural drainage characteristics as much as possible. Some of the measures on your lot are:

- Storm water infiltration soakaway pit across the front of the lot to temporarily store your rainwater runoff from larger and more intense storms, infiltrate that runoff into the ground, provide some pre-treatment/filtering, and erosion and sediment control for improved storm water quality.
- Front, side and rear yard storm water swales to temporarily store your lot runoff from larger and more intense storms, infiltrate that runoff into the ground, provide some pre-treatment/polishing, and erosion and sediment control for improved storm water quality.
- In addition, measures such as temporary silt fencing, are to be undertaken during construction to reduce erosion, sedimentation, and water quality impacts on the receiving system.

These measures assist in reducing the detrimental impact that the development may otherwise have on storm water quality and quantity of the receiving system.

What can you do to help?

The provision of the above noted measures alone does not solve the problem forever. The measures noted above must be maintained and the residents of each lot must practice preventative measures. The following is a non-inclusive list of homeowner obligations to keep the storm water infiltration trenches functioning properly:

1. Retain the grades on the property in compliance with the approved lot grading plan issued at the time of your home construction;
2. Prevent the storage of items or construction of shed in the front and rear yard in the area of the storm water infiltration soakaway pit and swales;
3. When building decks and patios, consider wooden decking as opposed to a harder and impermeable surfaces to minimize the amount of paved surfaces;
4. Prevent oil and fluid spills or leaks from motor vehicles;
5. Avoid pesticide use, particularly before major storm events and/or consider using organic alternatives to pesticides and fertilizers. This will help with water quality issues;
6. During winter maintenance consider sand and salt alternatives to reduce the amount of salt and sand from entering the side yard swales and roadside ditch to the front;
7. Prevent the entry of debris or pollutants of any kind from entering the infiltration soakaway pit;
8. Remove sediment and debris from the front, side and rear yard swales;
9. Remember that your front yard storm water infiltration soakaway pit and front, side and rear yard swales are designed to temporarily retain and pond runoff water during and after rainfall events.

Use of the above practices and being aware of the purpose of these systems will help keep and improve water quality in the Thames River.

NOTES:
1. REFER TO SHEET 2A & 2B FOR STORM SEWER LOCATION
2. REFER TO SHEET 2A & 2B FOR EXTENT OF SOAKAWAY PITS

GENERAL NOTES:

1. THE OWNER'S PROFESSIONAL ENGINEER IS REQUIRED TO FIELD REVIEW THE INSTALLATION OF SERVICES INCLUDED IN THIS PROJECT IN ACCORDANCE WITH THE GENERAL REVIEW COMMITMENT CERTIFICATION PROCESS. THE OWNER'S CONTRACTOR IS TO PROVIDE AT LEAST 48 HOURS NOTICE PRIOR TO COMMENCING CONSTRUCTION OF THE SITE SERVICES.
2. THE OWNER/OWNER'S CONTRACTOR SHALL HAVE ITS PROFESSIONAL ENGINEER PROVIDE FULL-TIME ONSITE REVIEW DURING CONSTRUCTION ON AN EXISTING MUNICIPAL STREET OR EASEMENT AND PROVIDE A CERTIFICATE OF COMPLETION OF WORKS UPON COMPLETION OF ALL WORKS TO BE CONSTRUCTED.
3. ALL WORK SHALL BE DONE IN ACCORDANCE WITH THE MINIMUM STANDARDS AND SPECIFICATIONS OF THE CURRENT ONTARIO BUILDING CODE (OBC) AND ANY APPLICABLE STATUTES, REGULATIONS, CODES AND BY-LAWS.
4. STRIK, BALDINELLI, MONIZ LTD. (SBM) IS NOT RESPONSIBLE FOR THE INFORMATION (EXISTING TOPOGRAPHY, BENCHMARKS, PROPERTY BOUNDARY, ETC.) PROVIDED BY OTHERS.

CONSTRUCTION NOTES:

1. REFER TO THE DRAFT PLAN/LOT GRADING PLANS FOR LAYOUT DIMENSIONING.
2. THE OWNER'S CONTRACTOR IS TO CONTACT THE CONSULTING ENGINEER (SBM) FOR FINAL ONSITE REVIEW. THE CONTRACTOR IS TO PROVIDE AT LEAST 48 HOURS NOTICE PRIOR TO REQUIRED ONSITE REVIEW.
3. THE OWNER'S CONTRACTOR SHALL TAKE ALL PRECAUTIONARY MEASURES UNDER THE OCCUPATIONAL HEALTH AND SAFETY ACT AS REQUIRED BY THE MINISTRY OF LABOUR TO EXECUTE THE WORK.
4. THE OWNER'S CONTRACTOR IS TO REVIEW AND CONFIRM ALL EXISTING CONDITION INFORMATION & INFORM SBM OF ANY DISCREPANCIES PRIOR TO CONSTRUCTION. SBM IN NO WAY ACCEPTS RESPONSIBILITY FOR ANY INACCURACIES FOUND ON THIS PLAN RELATIVE TO EXISTING CONDITIONS FOR THE SITE.
5. PRIOR TO COMMENCING ANY CONSTRUCTION, ALL SEWER OUTLET INFORMATION, BENCHMARKS, ELEVATIONS, DIMENSIONS, GRADES, ETC. MUST BE CHECKED BY THE CONTRACTOR AND VERIFIED AND ANY DISCREPANCIES REPORTED TO THE ENGINEERS.
6. PRIOR TO COMMENCING ANY WORK ON THE INSTALLATION OF SERVICES & GRADING, AN APPROVED SET OF PLANS AND SPECIFICATIONS MUST BE AVAILABLE ON THE JOB AND SHALL REMAIN THERE WHILE WORK IS BEING DONE.
7. STRIP FULL DEPTH OF TOPSOIL IN AREAS TO BE DISTURBED AND STOCK PILE FOR RE-USE IN GRASSED/LANDSCAPED AREAS.
8. OWNER'S CONTRACTOR IS RESPONSIBLE FOR ALL AS-BUILT INVERTS AND GRADES, RECORD ANY DEVIATION OF PIPE OR STRUCTURE LOCATION INVOLVED WITH THIS PROJECT AND OWNER'S CONTRACTOR TO PROVIDE A COPY OF THE AS-BUILT DRAWING SHOWING ALL CHANGES CLEARLY MARKED IN RED.
9. THE OWNER'S CONTRACTOR SHALL CONSTRUCT TEMPORARY MEASURES TO CONTROL SILT ENTERING THE STORM DRAINAGE SYSTEM TO THE SPECIFICATIONS OUTLINED IN THE GUIDELINES ON EROSION AND SEDIMENT CONTROL FOR URBAN CONSTRUCTION SITES PREPARED BY THE MINISTRY OF NATURAL RESOURCES. THESE MEASURES ARE TO BE INSTALLED PRIOR TO COMMENCING ANY CONSTRUCTION FOR THIS PROJECT AND ARE TO REMAIN IN PLACE UNTIL CONSTRUCTION HAS BEEN COMPLETED TO BASE ASPHALT AND SOD OR THE SATISFACTION OF THE MUNICIPAL ENGINEER.
10. THE CONTRACTOR SHALL INFORM VOYAGO & COUNTY OF MIDDLESEX AT LEAST ONE WEEK PRIOR TO COMMENCING CONSTRUCTION ON ANY STREET THAT IS AN INTER-COMMUNITY TRANSIT SERVICE BUS ROUTE THAT WILL BE AFFECTED BY CONSTRUCTION.
11. THE CONTRACTOR IS RESPONSIBLE FOR:
    - 11.1. CONNECTING ANY EXISTING SEWER OR DRAIN ENCOUNTERED DURING CONSTRUCTION TO A NEW SEWER OF SIMILAR TYPE, SIZE AND MATERIAL OR INTO ANOTHER EXISTING SEWER OF THE SAME TYPE AND TO REPORT ON AS-BUILT DRAWINGS.
    - 11.2. ENSURING THAT THERE IS NO INTERRUPTION OF ANY SURFACE OR SUBSURFACE DRAINAGE FLOW THAT WOULD ADVERSELY AFFECT NEIGHBOURING PROPERTIES.
12. NO FOUNDATION DRAIN CONNECTIONS WILL BE PERMITTED INTO THE SANITARY SEWERS AND NO DIRECT GRAVITY CONNECTIONS FROM THE FOUNDATION DRAINS WILL BE PERMITTED TO THE STORM SYSTEM UNLESS THE STORM SYSTEM HAS THE CAPACITY TO PROVIDE FOR SUCH CONNECTIONS TO THE SATISFACTION OF THE MUNICIPAL ENGINEER.
13. WORK ON OR ADJACENT TO THE MUNICIPAL/COUNTY RIGHT OF WAY (R.O.W.) SHALL BE COMPLETED IN ACCORDANCE WITH THE ONTARIO TRAFFIC MANUAL BOOK 7 CURRENT EDITION AND THE ONTARIO TRAFFIC MANUAL BOOK 18 CURRENT EDITION.

SURFACE WORKS NOTES:

1. ALL WORK IN THE MUNICIPAL/COUNTY ROAD ALLOWANCE SHALL MEET THE MINIMUM STANDARDS AND SPECIFICATIONS OF THE MUNICIPALITY OF MIDDLESEX CENTRE ENVIRONMENTAL AND ENGINEERING SERVICES DEPARTMENT. THE MUNICIPALITY OF MIDDLESEX CENTRE INFRASTRUCTURE DESIGN STANDARDS ARE TO BE APPLIED TO WORKS WITHIN THE MUNICIPAL/COUNTY ROAD ALLOWANCE UNLESS OTHERWISE APPROVED BY THE MUNICIPAL ENGINEER. THE CONTRACTOR IS REQUIRED TO OBTAIN & PAY FOR PERMIT TO WORK IN MUNICIPAL/COUNTY R.O.W.
2. ALL SURFACES WHICH ARE DISTURBED DURING CONSTRUCTION SHALL BE RESTORED TO A CONDITION AT LEAST AS GOOD AS ORIGINAL, OR AS PER BELOW (WHICHEVER IS GREATER) OR IF WITHIN THE MUNICIPAL/COUNTY RIGHT OF WAY TO THE SATISFACTION OF THE MUNICIPAL ENGINEER, ALL AT NO COST TO THE MUNICIPALITY.
    - 2.1. GRASSED AREAS TO BE RESTORED w/ 300mm (100mm OFF-SITE) TOPSOIL + SOD FOR WATER BALANCE REQUIREMENTS.
    - 2.2. ANY ASPHALT AREA DISTURBED DURING CONSTRUCTION SHALL BE RESTORED AS FOLLOWS:
        - 2.2.1. PROOF ROLL SUBGRADE (TO THE SATISFACTION OF THE GEOTECHNICAL ENGINEER) PRIOR TO PLACEMENT OF GRANULARS (98% STANDARD PROCTOR MAXIMUM DRY DENSITY (SPMDD) MIN.).
        - 2.2.2. MILL ADJACENT ASPHALT TO BE TIED INTO 50mm DEEP x 500mm WIDE PRIOR TO RESTORATION SEE DETAIL ON SHEET C1.
        - 2.2.3. MIN. RECOMMENDED PAVEMENT STRUCTURE (TO BE REVIEWED & APPROVED BY THE GEOTECHNICAL ENGINEER)
            - 40mm HL3 SURFACE ASPHALT COMPACTED TO 97% MARSHALL MIX DESIGN BULK DENSITY (TACK COAT REQUIRED PER OPSS.PROV 308 IF INSTALLED MORE THAN 2 WEEKS AFTER BINDER ASPHALT)
            - 50mm HL8 BINDER ASPHALT COMPACTED TO 97% MARSHALL MIX DESIGN BULK DENSITY
            - ASPHALT TO BE SUPPLIED AND PLACED IN ACCORDANCE WITH OPSS 310 & 1150
            - 150mm OF GRANULAR 'A' COMPACTED TO 100% SPMDD
            - 300mm OF GRANULAR 'B' COMPACTED TO 100% SPMDD
        - 2.2.4. MIN. RECOMMENDED GRAVEL APRON STRUCTURE (TO BE REVIEWED & APPROVED BY THE GEOTECHNICAL ENGINEER)
            - 240mm OF GRANULAR 'A' COMPACTED TO 100% SPMDD
            - 300mm OF GRANULAR 'B' COMPACTED TO 100% SPMDD
    - 2.3. RESTORE ALL PAVEMENT MARKINGS TO MATCH EXISTING PRE-CONSTRUCTION CONDITIONS AND MARKINGS SHALL BE COMPLETED IN ACCORDANCE WITH OPSS 710 'CONSTRUCTION SPECIFICATION FOR PAVEMENT MARKING'.
    - 2.4. ALL EXTERIOR HORIZONTAL CONCRETE SHALL BE MIN 100mm THICK, 32 MPa AT 28 DAYS c/w 5-8% AIR ENTRAINMENT, SLUMP OF 80mm (±20mm) OR 30mm (±10mm) WHEN USING A FORMING MACHINE AND TEMPERATURE BETWEEN 10-28°C. ON MIN 100mm THICK GRANULAR 'A' COMPACTED TO 100% SPMDD.
3. ALL AREAS OUTSIDE THE CONSTRUCTION LIMITS SHALL NOT BE DISTURBED. ANY DAMAGED TO THOSE AREAS ARE TO BE REPAIRED AT THE CONTRACTORS EXPENSE.

SERVICING NOTES:

1. ALL STORM SEWER INSTALLATION SHALL BE IN ACCORDANCE WITH THE CURRENT MUNICIPALITY OF MIDDLESEX CENTRE'S STANDARDS AND SPECIFICATIONS, THE CURRENT EDITION OF THE ONTARIO BUILDING CODE
2. ALL SITE SERVICES SHALL BE INSTALLED TO 1.0m OUTSIDE FOUNDATION WALL.
3. ALL ORGANIC, UNSTABLE OR UNSUITABLE MATERIALS BENEATH THE ROAD ALLOWANCE, SERVICES, UTILITIES, OR FOUNDATIONS MUST BE REMOVED AND THESE AREAS BACKFILLED WITH AN APPROVED FILL MATERIAL, AS TO THE SATISFACTION OF A GEOTECHNICAL ENGINEER AND SHOULD BE PLACED IN LIFTS NOT EXCEEDING 300mm (LOOSE) THAT ARE COMPACTED TO 95% SPMDD (100% FOR PAVED SURFACES). THE FILL MATERIAL SHOULD COMPRISE OF CLEAN, COMPACTIBLE FILL WITHIN 3% OF THE OPTIMUM MOISTURE CONTENT.
4. REMOVE ALL TRENCH WATER WHEN PIPE LAYING IS IN PROGRESS. ALL REQUIREMENTS FOR DEWATERING PERMITS (INCLUDING THE MINISTRY OF ENVIRONMENT, CONSERVATION AND PARKS (M.E.C.P.)'S PERMIT TO TAKE WATER, IF REQUIRED) SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
5. CONNECTIONS FROM FOUNDATIONS, WEEPING TILE, SUMP PUMP, AND ROOF DRAINS ARE NOT PERMITTED TO ENTER THE SANITARY SEWER SYSTEM AND SHALL BE IN ACCORDANCE WITH THE MUNICIPALITY OF MIDDLESEX CENTRE'S BY-LAW'S.
6. ALL PROPOSED STORM SEWER PIPE SHALL BE: PVC SMOOTH WALL (CSA B182.2) (100ø TO 600ø) OR RIBBED (CSA B182.4) (200ø TO 600ø) OR HDPE (CSA B182.6, 320 kPA ON-SITE PER OBC AND CSA B182.8 IN R.O.W.) (200ø TO 600ø) OR NON-REINFORCED CONCRETE (CAN/CSA 257.1) (100ø TO 600ø) OR REINFORCED CONCRETE (CAN/CSA 257.2). PVC PIPE SHALL BE LAID WITH TYPE 1 BEDDING UNDER 4.5m OF COVER AND TYPE II BEDDING OVER 4.5m OF COVER. CONCRETE PIPE SHALL BE LAID WITH CLASS B (B1 OR B2) BEDDING. ALL SEWER BACKFILL MUST BE COMPACTED TO 95% STANDARD MAXIMUM DRY DENSITY (MINIMUM) (100% FOR PAVED AREAS). REFER TO THE MUNICIPALITY OF MIDDLESEX CENTRE'S FIGURE 2.9.
7. THE MINIMUM DEPTH OF A STORM SEWER SHALL BE 1.22m FROM THE FINISHED GROUND ELEVATION TO THE CROWN OF THE PIPE AS PER OPSD 3090.101 'FOUNDATION, FROST PROTECTION DEPTHS FOR SOUTHERN ONTARIO' OR GEOTECHNICAL REPORT. WHERE MINIMUM DEPTHS CANNOT BE ACHIEVED AND THEREFORE FROST PROTECTION IS WARRANTED, INSULATION IS REQUIRED AS PER THE MUNICIPALITY OF MIDDLESEX CENTRE'S FIGURE 5.2 'INSULATION STANDARD FOR SHALLOW MAINS AND OFFSETS'.
8. ALL STORM AND SANITARY SEWERS/SERVICES AND CATCHBASIN LEADS SHALL HAVE APPROVED RUBBER GASKET JOINTS + BE INSTALLED USING A LASER LEVEL.
9. WATER SERVICE SHALL BE PASSED UNDER FOOTINGS WITH 0.60m MIN SEPARATION.
10. WHERE ANY WATER SERVICE CONNECTION IS REQUIRED TO BE MADE FOLLOWING THE CONSTRUCTION OF CURB, GUTTER, CONCRETE SIDEWALKS, AND/OR WEARING SURFACE COAT OF ASPHALT ON ANY STREET IN A NEW SUBDIVISION, SUCH WATER SERVICE CONNECTION SHALL NOT BE MADE USING 'OPEN CUT' METHODS BUT SHALL BE MADE USING TRENCHLESS TECHNOLOGIES AND IN SUCH A MANNER AS TO ELIMINATE THE POSSIBILITY OF SETTLEMENT OF SUCH CURB, GUTTER, CONCRETE SIDEWALKS AND/OR WEARING SURFACE COAT OF ASPHALT; IT BEING UNDERSTOOD THAT THIS POLICY SHALL APPLY, EXCEPT WHERE IN THE OPINION OF THE MUNICIPAL/COUNTY ENGINEER, GROUND CONDITIONS ARE SUCH THAT THE USE OF DRILLING OR BORING METHODS BECOME UNREASONABLE OR UNECONOMICAL.
11. ALL WATERMAIN MATERIAL AND CONSTRUCTION SHALL CONFORM TO THE CURRENT MUNICIPALITY OF MIDDLESEX CENTRE'S STANDARDS AND SPECIFICATIONS.
12. ALL FIRE HYDRANTS SHALL BE 3-WAY HYDRANTS c/w STORZ CONNECTION OPENING COUNTER-CLOCKWISE AS PER THE MUNICIPALITY OF MIDDLESEX CENTRE'S STANDARDS AND SPECIFICATIONS.
13. ALL WATERMAIN VALVES SHALL BE GATE VALVES MANUFACTURED TO AWWA C500 AND EPOXY COATED TO AWWA C550 AND ARE TO OPEN COUNTER-CLOCKWISE.
14. INSTALLATION, HYDROSTATIC TESTING, SWABBING, FLUSHING AND DISINFECTION SHALL BE DONE IN ACCORDANCE WITH THE MUNICIPALITY OF MIDDLESEX CENTRE'S STANDARDS AND SPECIFICATIONS.
15. SEPARATION BETWEEN BURIED WSC & PDC AS OUTLINED IN THE CURRENT EDITION OF THE M.E.C.P. "DESIGN GUIDELINES FOR DRINKING-WATER SYSTEMS" SECTION F-6-1 "PROCEDURES TO GOVERN SEPARATION OF SEWERS AND WATERMAINS" AND INSULATE WATER SERVICE AS PER CLAUSE 7.3.5.4. "PROTECTION FROM FROST' OF THE CURRENT EDITION OF THE ONTARIO BUILDING CODE, WHERE REQUIRED. ALL SUBSTITUTIONS MUST BE APPROVED BY THE MUNICIPALITY ENGINEER.
16. WATER SERVICE TO BE PEX AND ALL WATER PIPE TO HAVE 12AWG TRACER WIRE INSTALLED ON ALL PVC WATERMAINS, VALVES, AND FIRE HYDRANTS. APPROVED TRACER WIRE FOR OPEN CUT INSTALLATION: "COPPERHEAD 1230-HS". WATERMAIN TO BE INSTALLED 2.1m BELOW ROAD GRADE OR 1.1m BELOW THE BOTTOM OF DITCH, WHICHEVER IS GREATER AND SHALL NOT BE LESS THAN 1.5m COVER COVER. PEX WATER SERVICE REQUIRES BRASS FITTINGS. PROVIDE PIPE RESTRAINTS AS REQUIRED BY THE PIPE MANUFACTURER.
17. WATERMAINS/SERVICES SHALL CROSS ABOVE SEWERS WITH SUFFICIENT VERTICAL SEPARATION TO ALLOW FOR PROPER BEDDING AND STRUCTURAL SUPPORT OF THE WATERMAIN/SERVICE AND SEWER MAINS AS OUTLINED IN THE CURRENT EDITION OF THE M.E.C.P. "DESIGN GUIDELINES FOR DRINKING-WATER SYSTEMS" SECTION F-6-1 "PROCEDURES TO GOVERN SEPARATION OF SEWERS AND WATERMAINS" AND INSULATE WATER SERVICE AS PER CLAUSE 7.3.5.4. "PROTECTION FROM FROST" OF THE CURRENT EDITION OF THE ONTARIO BUILDING CODE, WHERE REQUIRED.
18. ALL SUBSTITUTIONS MUST BE APPROVED BY THE MUNICIPAL/COUNTY ENGINEER.
19. THE ELEVATION OF THE GROUND WATER TABLE IS UNKNOWN. CONTRACTOR TO ADVISE SBM IF GROUNDWATER IS ENCOUNTERED DURING EXCAVATION OPERATIONS; FURTHER REVIEW/INVESTIGATION BY A GEOTECHNICAL ENGINEER MAY BE REQUIRED. IF GROUNDWATER IS ENCOUNTERED DURING EXCAVATION OPERATIONS, CIVIL STRUCTURES ARE TO BE DESIGNED FOR HYDROSTATIC PRESSURE AND UPLIFT/BUOYANCY FORCES. PROVIDE SHOP DRAWINGS SEALED BY A PROFESSIONAL ENGINEER LICENSED IN THE PROVINCE OF ONTARIO FOR REVIEW

SEDIMENT & EROSION CONTROL MEASURES:

1. PROTECT ALL EXPOSED SURFACES AND CONTROL ALL RUNOFF DURING CONSTRUCTION.
2. SEDIMENT AND EROSION CONTROL MEASURES TO BE REMOVED AT COMPLETION OF PROJECT (FOLLOWING COMPLETION OF BASE ASPHALT AND SOD).
3. MAINTAIN EROSION CONTROL MEASURES DURING CONSTRUCTION.
4. ALL COLLECTED SEDIMENT TO BE DISPOSED OF AT AN APPROVED LOCATION.
5. MINIMIZE AREA DISTURBED DURING CONSTRUCTION.
6. ALL DEWATERING TO BE DISPOSED OF IN AN APPROVED SEDIMENTATION BASIN.
7. PROTECT ALL CATCH BASINS, MAINTENANCE HOLES AND PIPE ENDS FROM SEDIMENT INTRUSION WITH GEOTEXTILE FABRIC (TERRAFIX 270 R), SILT SACKS, OR APPROVED EQUAL.
8. KEEP ALL SUMPS CLEAN DURING CONSTRUCTION.
9. PREVENT WIND-BLOWN DUST.
10. STRAW BALES TO BE USED IN LOCALIZED AREAS AS DIRECTED BY THE ENGINEER DURING CONSTRUCTION FOR WORKS WHICH ARE IN OR ADJACENT TO FLOOD LINES, FILL LINES AND HAZARDOUS SLOPES.
11. STRAW BALES TO BE TERMINATED BY ROUNDING BALES TO CONTAIN AND FILTER RUNOFF.
12. OBTAIN APPROVAL FROM THE UPPER THAMES RIVER CONSERVATION AUTHORITY (UTRCA) PRIOR TO CONSTRUCTION FOR WORKS WHICH ARE IN, OR ADJACENT TO FLOOD LINES, FILL LINES AND HAZARDOUS SLOPES.
13. ALL SILT FENCING AND DETAILS ARE AT THE MINIMUM TO BE CONSTRUCTED IN ACCORDANCE WITH THE MINISTRY OF NATURAL RESOURCES GUIDELINES ON EROSION AND SEDIMENT CONTROL FOR URBAN CONSTRUCTION SITES.
14. ALL OF THE ABOVE NOTES AND ANY SEDIMENT & EROSION CONTROL MEASURES ARE AT THE MINIMUM TO BE IN ACCORDANCE WITH THE MINISTRY OF NATURAL RESOURCES GUIDELINES ON EROSION AND SEDIMENT CONTROL FOR URBAN CONSTRUCTION SITES.
15. SEDIMENT AND EROSION CONTROL MEASURES ARE TO BE INSPECTED WEEKLY OR FOLLOWING SIGNIFICANT RAINFALL EVENTS.
16. ON-SITE SEDIMENT AND EROSION CONTROL MEASURES ARE TO BE REVIEWED AND MODIFIED TO MEET THE CHANGING SITE.
17. SEDIMENT AND EROSION CONTROL MEASURES SHALL BE REPAIRED WITHOUT DELAY BY THE OWNERS CONTRACTOR AS INSTRUCTED BY THE CONTRACT ADMINISTRATOR/ENGINEER AT NO EXPENSE TO THE OWNER.

UTILITIES NOTES:

1. ALL WORK FOR COORDINATION, DESIGN, AND CONSTRUCTION OF UTILITIES IS BY OTHERS. SBM DESIGN AND DRAWINGS ARE FOR MUNICIPAL SERVICING ONLY. ANY UTILITY INFORMATION SHOWN IS FOR REFERENCE/COORDINATION PURPOSES ONLY AND MAY NOT BE ACCURATE.
2. THE UTILITIES PROVIDERS MUST BE INFORMED AT LEAST TWO WEEKS PRIOR TO CONSTRUCTION ON ANY EXISTING MUNICIPALITY/COUNTY ROAD ALLOWANCE. ALL EXISTING UNDERGROUND SERVICE OR UTILITIES WITHIN THE LIMITS OF THE CONSTRUCTION SITE SHALL BE LOCATED AND MARKED. ANY UTILITIES, DAMAGED OR DISTURBED DURING CONSTRUCTION, SHALL BE REPAIRED OR REPLACED TO THE SATISFACTION OF THE GOVERNING BODY AT THE CONTRACTOR'S EXPENSE.
3. ALL EXISTING UNDERGROUND UTILITY (TELEPHONE, HYDRO, GAS, CABLE, SEWER, WATERMAINS, ETC.) THAT WILL BE CROSSED UNDER DURING THE INSTALLATION OF SERVICES FOR THIS DEVELOPMENT SHALL BE SUPPORTED, AS MAY BE REQUIRED BY THE OWNERS OF THE UTILITY BEING CROSSED UNDER.
4. OWNER'S CONTRACTOR TO LOCATE/FIELD VERIFY LOCATION OF ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION.
5. OWNER'S CONTRACTOR TO COORDINATE WITH UTILITIES PROVIDER FOR BRACING, DECOMMISSIONING AND/OR RELOCATION OF EXISTING GAS, HYDRO, TELEPHONE, CABLE, ETC. SERVICES, IF REQUIRED.

REFERENCE DOCUMENTS:

1. SERVICING MEMORANDUM PREPARED BY SBM, PROJECT No: SBM-21-0716, DATED JANUARY 25, 2023.
2. INFORMATION OBTAINED FROM AS-CONSTRUCTED DRAWINGS BY SPRIET ASSOCIATES LTD, DATED APRIL 15, 1994.
3. TOPOGRAPHIC INFORMATION OBTAINED FROM PLANS BY CALLON DIETZ INC. FILE No. 20-23779 A PLOT STAMP DATED SEPTEMBER 7, 2022.
4. LEGAL INFORMATION OBTAINED FROM AUTOCAD COORDINATION FILE 'DRAFT PLAN' PROVIDED BY BROCK DEVELOPMENT GROUP INC. REVISIONS 2 DATED AUGUST 1, 2022.
5. INFORMATION OBTAINED FROM SOIL TESTING FOR WASTEWATER SERVICING REPORT BY BOS ENGINEERING & ENVIRONMENTAL SERVICES INC. REVISED JUNE 2, 2021 AND UPDATED OCTOBER 22, 2022.

SITE BENCHMARK:

MONUMENT TYPE: BOLT (BM02-50)

LOCATION: BRICK PRIVACY WALL ON THE SOUTHWEST CORNER OF SUNNINGDALE ROAD EAST AND SOUTH WENIGE DRIVE. BOLT SET IN THE NORTH FACE OF THE WALL, 0.21m BELOW THE BRICK AND 0.71m WEST OF THE 45 DEGREE ANGLE OF THE WALL.

GEODETIC ELEVATION: 259.153 (CGVD28, 1978)

MONUMENT TYPE: BOLT (BM02-43)

LOCATION: CONCRETE BOX CULVERT CROSSING SUNNINGDALE ROAD EAST, 320m WEST OF THE CENTRELINE OF HIGHBURY AVENUE NORTH. BOLT SET IN THE EAST FACE ON THE NORTH SIDE OF SUNNINGDALE ROAD EAST, 0.12m SOUTH OF THE NORTHEAST CORNER AND 0.12m DOWN FROM THE TOP.

GEODETIC ELEVATION: 260.902 (CGVD28, 1978)

(CONTRACTOR TO CONFIRM BENCHMARK ELEVATIONS)

LIST OF ITEMS REQUIRING ENGINEER'S REVIEW

NOTE: CONTRACTOR TO PROVIDE MIN. 48 HOURS NOTICE PRIOR TO REQUESTED FIELD REVIEW TIME.
EROSION AND SEDIMENT CONTROL MEASURES, UPON COMPLETION
SERVICING IN MUNICIPAL RIGHT-OF-WAY (R.O.W.), EXISTING AND FUTURE, DURING CONSTRUCTION
SOAK-AWAY PIT EXCAVATION PRIOR TO BACKFILL
GRADING - ROAD SUBGRADE, PRIOR TO GRANULARS
GRADING - GRANULAR 'B', PRIOR TO GRANULAR 'A'
GRADING - GRANULAR 'A', PRIOR TO BASE AS

GRADING CERTIFICATE:

I HEREBY CERTIFY THAT THE PROPOSED GRADING AND APPURTENANT DRAINAGE WORKS COMPLY WITH SOUND ENGINEERING DESIGN AND THAT THE PROPOSED GRADING IS COMPATIBLE WITH EXISTING DRAINAGE PATTERNS ON AND ACROSS THESE LANDS AND THE ADJOINING LANDS OR APPLICABLE MUNICIPAL BY-LAWS.

GRADING NOTES:

1. EXISTING GRADES AND DRAINAGE OF ABUTTING LANDS IS NOT TO BE DISTURBED.
2. LOCALIZED SURFACE DRAINAGE FROM ABUTTING PROPERTIES TO BE DEVELOPED IN THE FUTURE MAY BE DISCHARGED ONTO THE PROPOSED LOTS IN THIS SUBDIVISION.
3. BASEMENT OPENINGS TO BE MINIMUM 300mm ABOVE THE CENTRELINE OF ROAD UNLESS OTHERWISE APPROVED BY THE DIRECTOR OF PUBLIC WORK AND ENGINEERING.
4. GROUND ELEVATIONS AT BUILDINGS ABUTTING OVERLAND FLOW ROUTES ARE TO BE 300mm ABOVE OVERLAND FLOW ROUTE ELEVATIONS.
5. GROUND ELEVATIONS AT BUILDING OPENING ABUTTING OVERLAND FLOW ROUTES ARE TO TO BE 450mm ABOVE OVERLAND FLOW ROUTE ELEVATIONS.
6. SUMP PUMP DISCHARGE MUST BE DIRECTED AWAY FROM DRIVEWAYS AND SIDEWALKS AND MUST NOT EXTEND BEYOND PROPERTY LIMITS. NO SANITARY SEWER CONNECTIONS PERMITTED.
7. A MINIMUM OF 150mm (6") FROM THE TOP OF FOUNDATION TO THE FINISHED GRADE OUTSIDE THE BUILDING MUST BE PROVIDED, TYPICAL.
8. RETAINING WALLS, 1000mm OR GREATER, & GUARD RAILS ON TOP (IF REQUIRED) ARE TO BE DESIGNED BY AND CONSTRUCTED TO THE SPECIFICATIONS OF A REGISTERED PROFESSIONAL ENGINEER IN ACCORDANCE WITH THE ONTARIO BUILDING CODE.
9. THE MIN. TOP OF FOUNDATION ELEVATION, UNDERSIDE OF FOOTING ELEVATION, BASEMENT WINDOW SILL ELEVATION, ETC. ARE TO BE CONFIRMED BY THE CONTRACTOR IN CONSULTATION WITH THE BUILDING DESIGNER, BASED ON THE FINISHED FLOOR ELEVATION PROVIDED. CONTACT STRIK, BALDINELLI, MONIZ LTD. (SBM) FOR CLARIFICATION, IF REQUIRED.

THE OWNER'S CONTRACTOR SHALL PROVIDE TRAFFIC CONTROL MEASURES IN COMPLIANCE WITH THE ONTARIO TRAFFIC MANUAL BOOK 7 FOR ALL WORKS WITHIN THE MUNICIPALITY RIGHT-OF-WAY. THE OWNER'S OWNER'S CONTRACTOR SHALL SUBMIT TRAFFIC CONTROL PLANS TO THE MUNICIPALITY/ENGINEER FOR REVIEW PRIOR TO PROCEEDING WITH CONSTRUCTION.

CULVERT NOTE:
CULVERTS TO BE PLACED MATCHING EXISTING DITCH GRATE

INSULATION NOTE:
INSULATE SEWERS AS PER THE A-7.3.5.4.(1) FROM THE CURRENT ONTARIO BUILDING CODE COMPENDIUM WHERE 1.22m COVER CANNOT BE PROVIDED.

UNLESS OTHERWISE NOTED ON THE PLANS, GEOTEXTILE SHALL BE NON-WOVEN TO MEET CLASS 2-OPSS 1860.07.02 (I.E. TERRAFIX 270R, OR APPROVED EQUAL) WITH 300mm MIN. OVERLAPS.

ALL WATERMAIN CONSTRUCTION TO CONFORM TO THE CURRENT STANDARDS AND SPECIFICATIONS OF THE MUNICIPALITY OF MIDDLESEX CENTRE PUBLIC WORKS & ENGINEERING DEPARTMENT. WHERE WATERMAIN/SERVICE IS LESS THAN 2.1m BELOW ROAD GRADE OR 1.1m BELOW THE BOTTOM OF DITCH, WHICHEVER IS GREATER AND SHALL NOT BE LESS THAN 1.5m COVER (EVEN TEMPORARY CONDITIONS), THE WATERMAIN/SERVICE SHALL BE ADEQUATELY INSULATED OVER THE AFFECTED LENGTH AS PER THE MUNICIPALITY OF MIDDLESEX CENTRE FIGURE 5.2.

SILT FENCE TO BE CONSTRUCTED ON PROPERTY LINE. LINE WORK IS NOT SHOWN FOR CLARITY.

OWNER'S CONTRACTOR SHALL BE RESPONSIBLE FOR REGULAR MONITORING & CLEANUP OF TRACKED MUD/DEBRIS ON ADJACENT LANDS & PUBLIC ROADS TO THE SATISFACTION OF THE ENGINEER/MUNICIPALITY OF MIDDLESEX CENTRE.

OWNER'S CONTRACTOR SHALL TAKE ALL REASONABLE MEASURES TO AVOID MIXING TOPSOIL WITH SUBSOIL, WHERE REQUIRED FOR REUSE ON-SITE.

TOPSOIL STOCKPILE SIZES/LOCATIONS TO BE DETERMINED IN THE FIELD. SILT FENCE SHALL BE CONSTRUCTED AT TOE OF DOWNGRADE EDGES OF TOPSOIL STOCKPILE

ALL NATIVE FILL PLACED SHALL MEET THE REQUIREMENTS FOR ENGINEERED FILL, COMPACTED TO 100% SPMDD OR AS OUTLINED IN THE GEOTECHNICAL REPORT.

WINDOW WELL NOTE:
ALL WINDOW WELLS SHALL BE PROJECTED UP TO ELEVATION 275.15m OR 150mm ABOVE FINISHED GRADE MIN, WHICHEVER IS GREATER, TO PROTECT AGAINST POTENTIAL FLOODING

FILTER FABRIC AND STRAW BALE BARRIERS SHALL BE INSTALLED AND MAINTAINED IN EXISTING DICB's FOR DURATION OF PROJECT UNTIL SURFACES ARE PAVED AND BOULEVARDS ARE SODDED.

SITE PREPARATION NOTE:
THIS PLAN HAS BEEN PREPARED TO IDENTIFY REMOVALS, EROSION & SEDIMENT CONTROL MEASURES AND TEMPORARY CONSTRUCTION WORKS FOR THE BENEFIT OF THE OWNER'S CONTRACTOR IN ADVANCE OF SERVICING WORKS. IT IS NOT INTENDED TO IDENTIFY PERMANENT GRADING PATTERNS.

DISPOSAL NOTE:
ALL ITEMS NOTED AS "TO BE REMOVED" SHALL BE DISCARDED OFF-SITE AT AN APPROVED FACILITY.

OWNER'S CONTRACTOR TO CLEAR AND GRUB SITE PRIOR TO CONSTRUCTION AND DISPOSE OF ALL DEBRIS AND EXCESS FILL/TOPSOIL OFF-SITE AT AN APPROVED FACILITY.

SUMP PUMP AND DRAIN LOCATIONS ARE SHOWN FOR SCHEMATIC PURPOSES ONLY. REFER TO ARCHITECTS PLANS FOR SUMP PUMP DESIGN.

SERVICE STUBS TO BE CAPPED AT 1.0m O/S FROM BUILDING ENVELOPE FOR CONNECTION ONCE BUILDING SERVICES ARE INSTALLED.

OVERFLOW PIPE FROM THE ROOF LEADER TO SPLASH PAD AS PER DETAIL ON THIS SHEET.

SOAKAWAY PIT DESIGNED IN ACCORDANCE WITH SECTION 4.5.6 OF M.E.C.P. STORMWATER MANAGEMENT PLANNING AND DESIGN MANUAL (SWMP)

ALL PROP WATER METERS ARE c/w DOUBLE CHECK VALVE ASSEMBLIES (DCVA) FOR PREMISE ISOLATION

SEDIMENT AND EROSION CONTROL MEASURES MAY ONLY BE REMOVED UPON STABILIZATION OF CONTRIBUTING CATCHMENT AREA AND SUBJECT TO APPROVAL OF ENGINEER/MUNICIPALITY OF MIDDLESEX CENTRE.

STORM DRAINAGE NOTE:
STORM DRAINAGE MAY TEMPORARILY NEED TO BE CONTROLLED AND PUMPED FROM STORM SEWER SYSTEM. ANY SUCH TEMPORARY MEASURES SHALL BE CONDUCTED AT NO EXTRA COST TO THE CONTRACT AND BE BASED UPON THE OWNER'S CONTRACTOR'S WATER CONTROL PLANS. WHICH MUST BE APPROVED BY THE CONTRACT ADMINISTRATOR/ENGINEER PRIOR TO CONSTRUCTION.

OWNER'S CONTRACTOR SHALL BE RESPONSIBLE FOR TEMPORARY CONSTRUCTION MEASURES SUCH AS, BUT NOT LIMITED TO, PIPE COVER AT NO ADDITIONAL CHARGE TO THE CONTRACT.

STORM SERVICING NOTE:
NO BUILDING DRAIN (SUMP/WEEPING TILE/RAIN WATER LEADER) CONNECTIONS WILL BE PERMITTED INTO THE SANITARY SEWERS.

MUNICIPALITY OF MIDDLESEX CENTRE
COUNTY OF MIDDLESEX

SITE BENCHMARK:

MONUMENT TYPE: BOLT (BM02-50)

LOCATION: BRICK PRIVACY WALL ON THE SOUTHWEST CORNER OF SUNNINGDALE ROAD EAST AND SOUTH WENIGE DRIVE. BOLT SET IN THE NORTH FACE OF THE WALL, 0.21m BELOW THE BRICK AND 0.71m WEST OF THE 45 DEGREE ANGLE OF THE WALL.

GEODETIC ELEVATION: 259.153 (CGVD28, 1978)

MONUMENT TYPE: BOLT (BM02-43)

LOCATION: CONCRETE BOX CULVERT CROSSING SUNNINGDALE ROAD EAST, 320m WEST OF THE CENTRELINE OF HIGHBURY AVENUE NORTH. BOLT SET IN THE EAST FACE ON THE NORTH SIDE OF SUNNINGDALE ROAD EAST, 0.12m SOUTH OF THE NORTHEAST CORNER AND 0.12m DOWN FROM THE TOP.

GEODETIC ELEVATION: 260.902 (CGVD28, 1978)

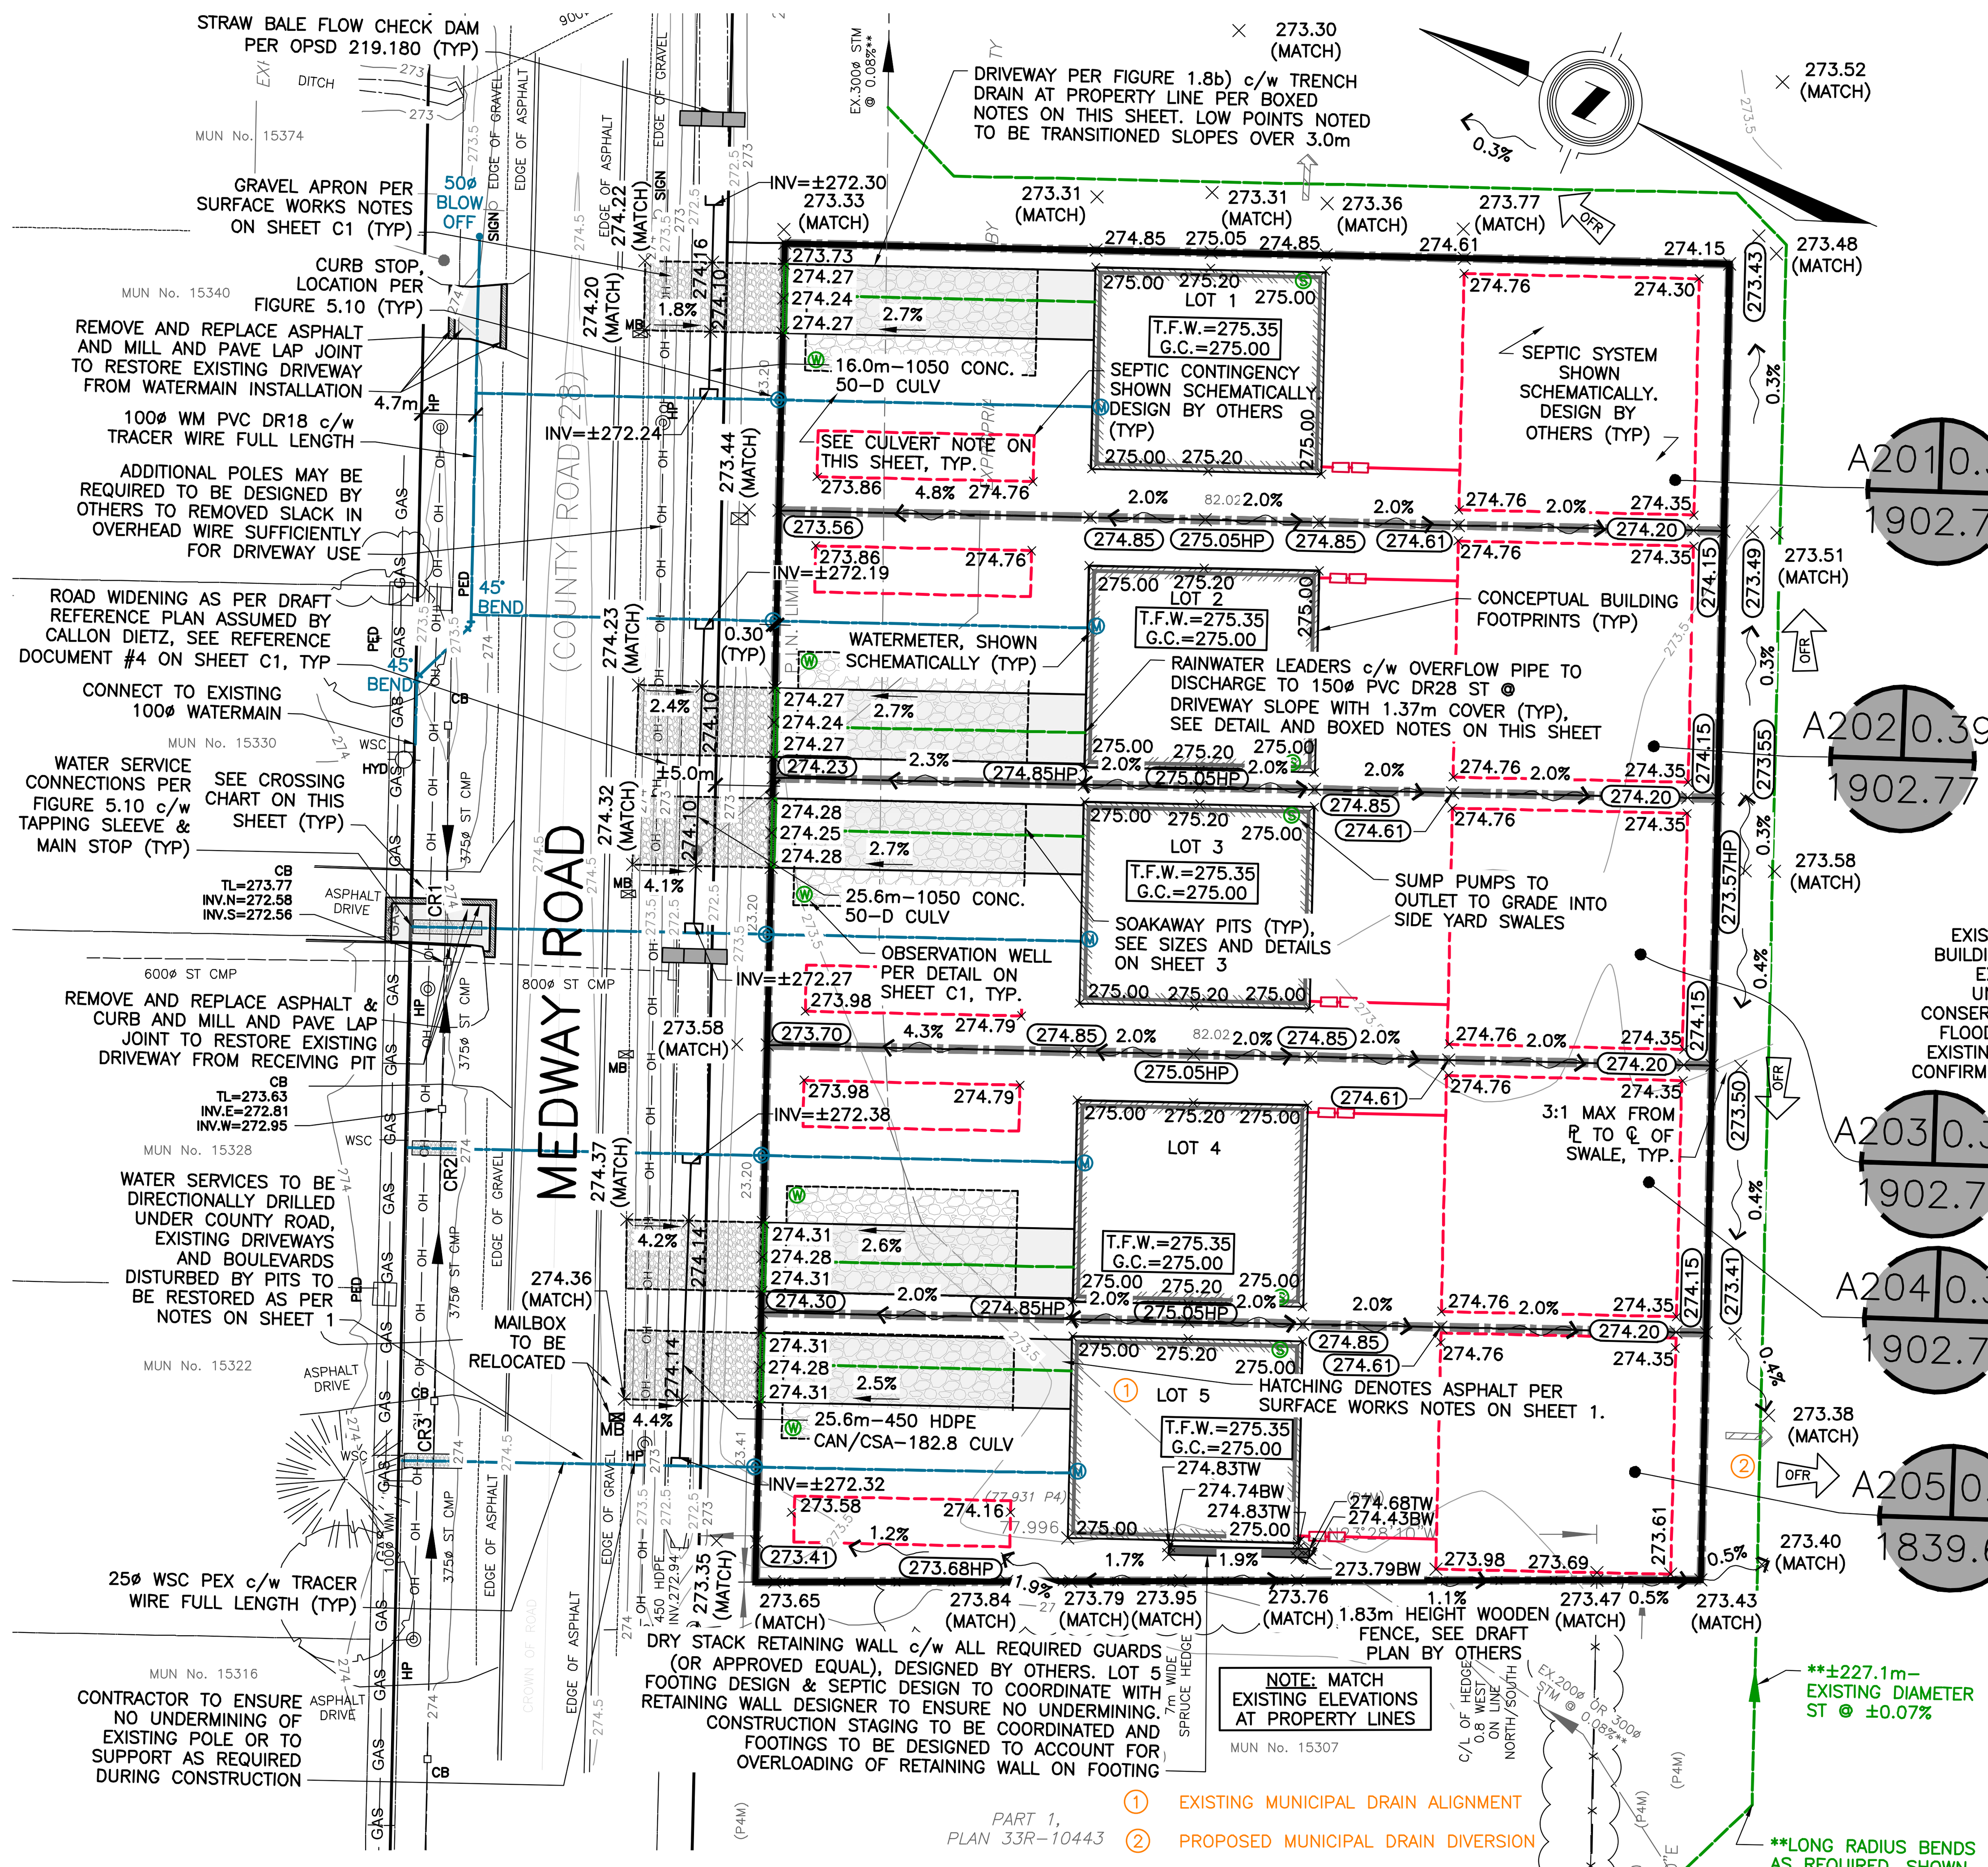
(CONTRACTOR TO CONFIRM BENCHMARK ELEVATIONS)

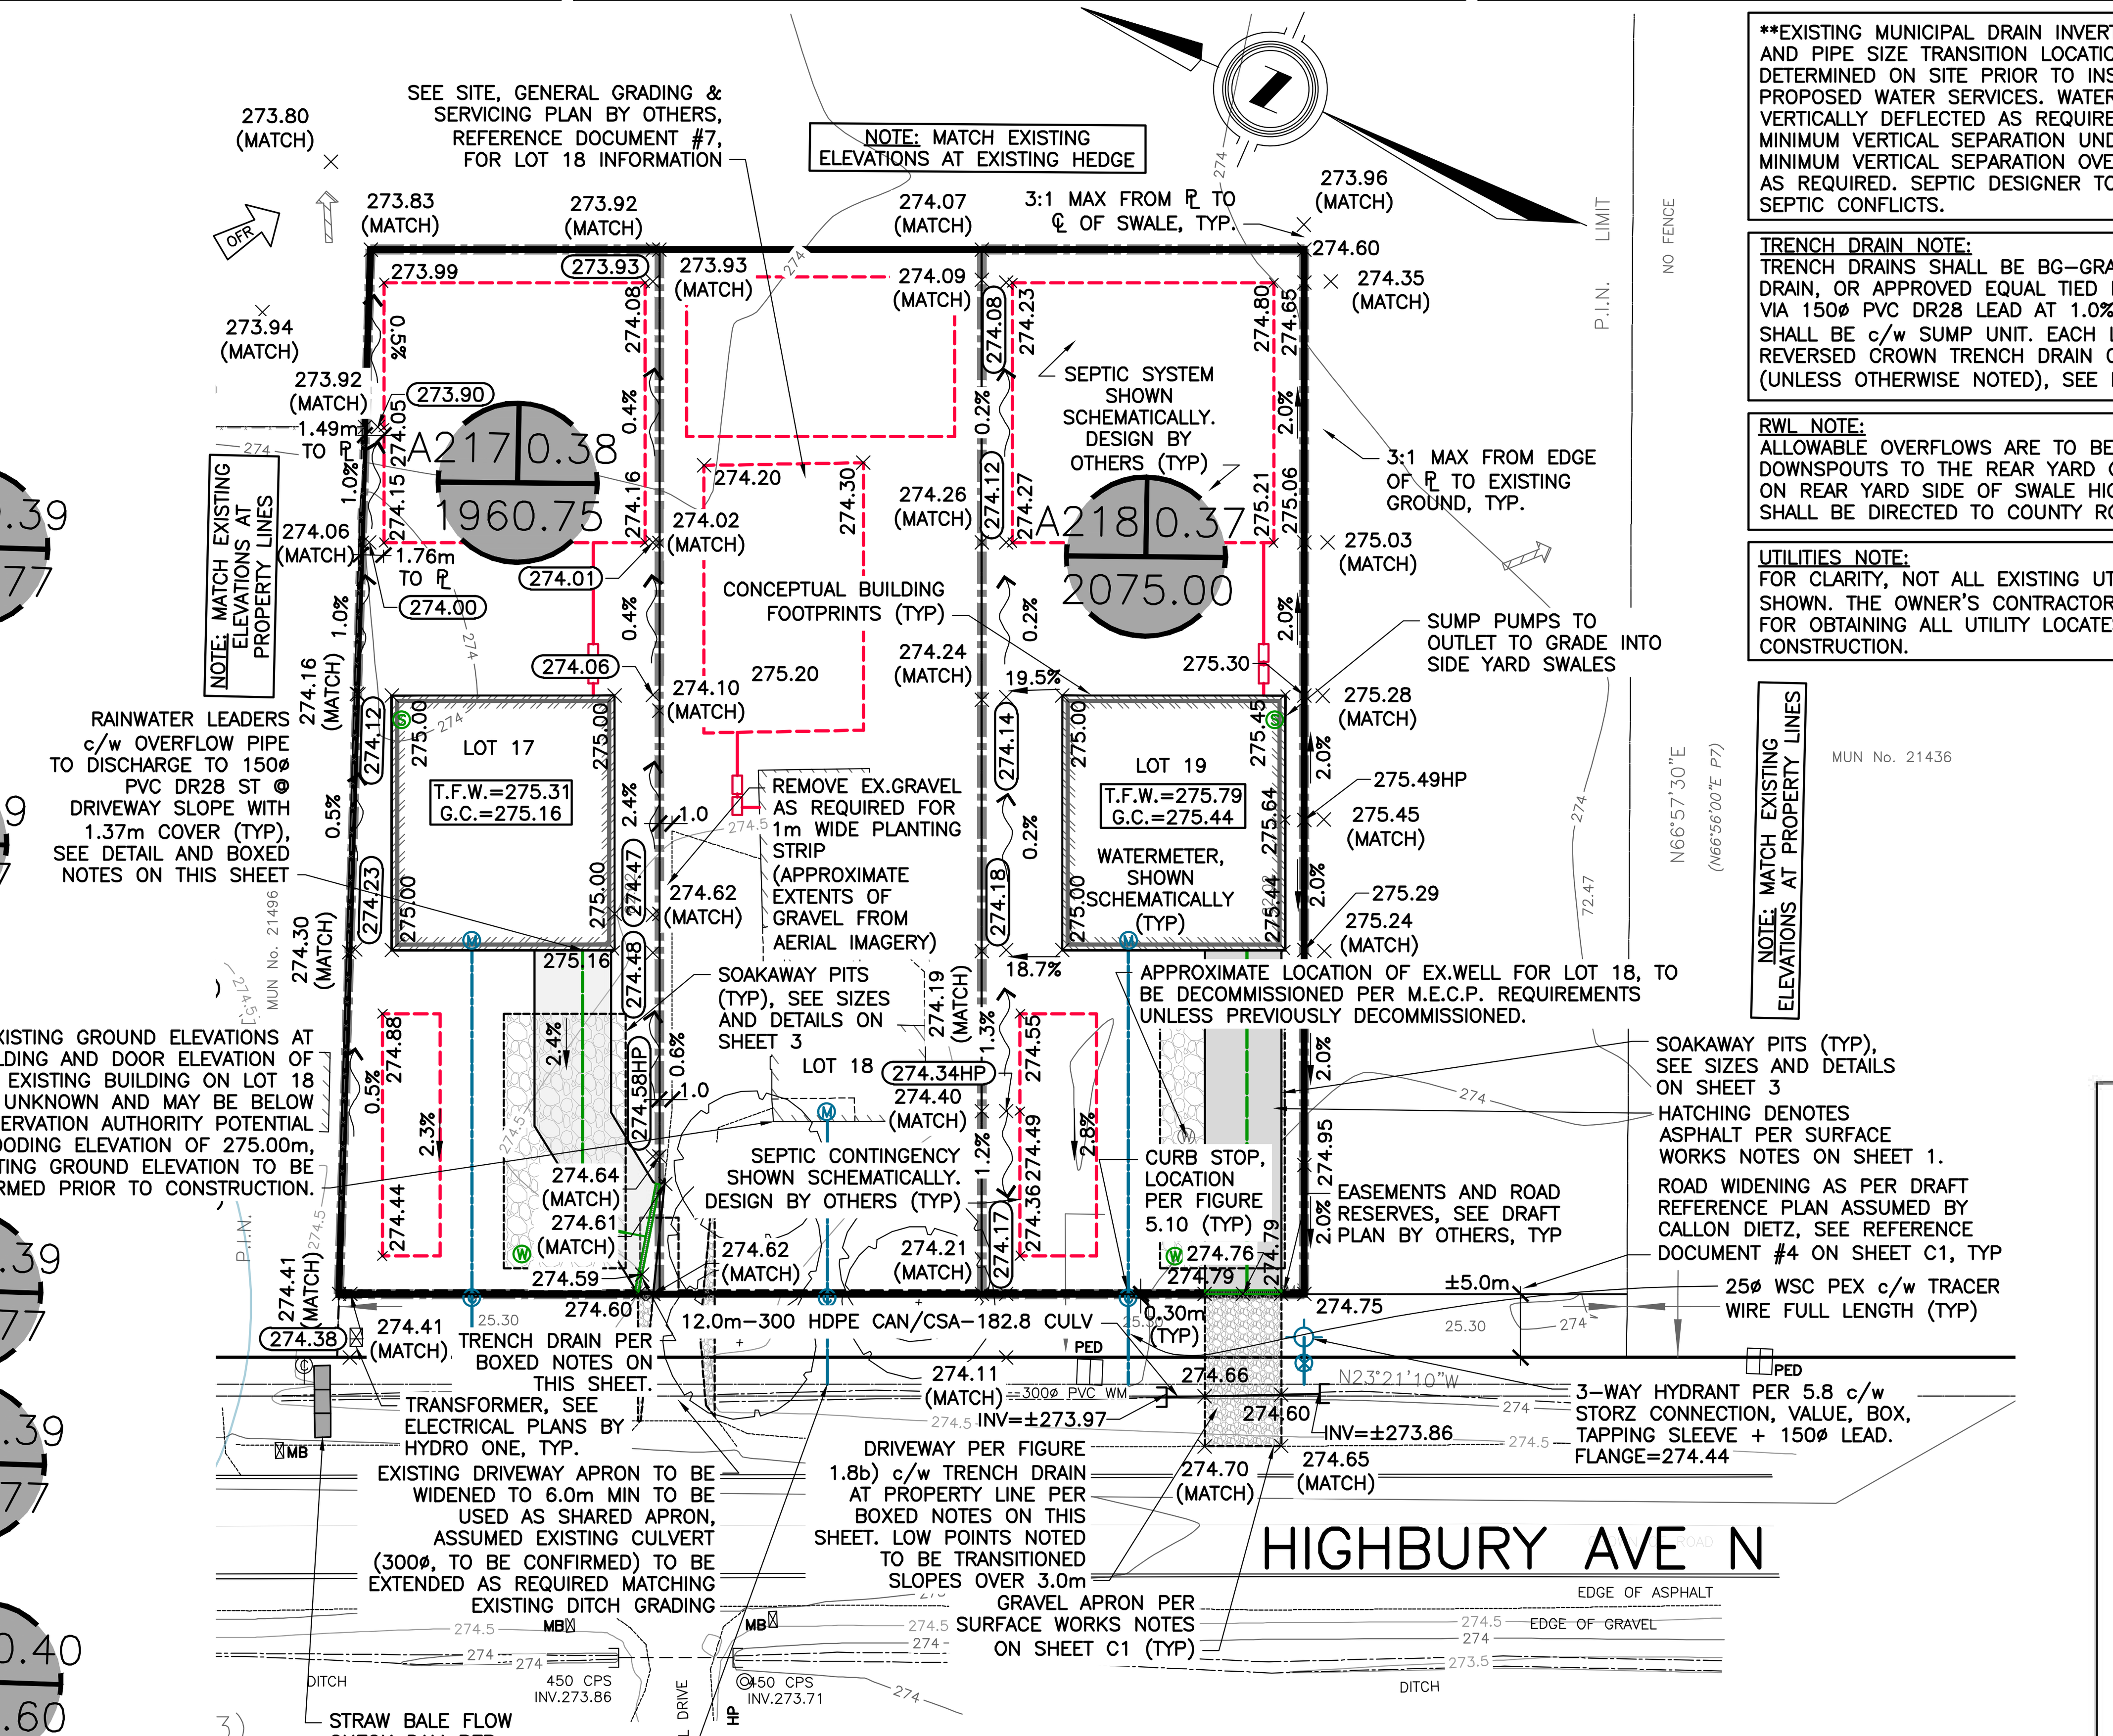
**EXISTING MUNICIPAL DRAIN INVERTS, EXACT LOCATION, AND PIPE SIZE TRANSITION LOCATION UNKNOWN. TO BE DETERMINED ON SITE PRIOR TO INSTALLATION OF PROPOSED WATER SERVICES. WATER SERVICES TO BE VERTICALLY DEFLECTED AS REQUIRED FOR 0.50m MINIMUM VERTICAL SEPARATION UNDER STORM OR 0.23m MINIMUM VERTICAL SEPARATION OVER STORM. INSULATE AS REQUIRED. SEPTIC DESIGNER TO BE CONTACTED FOR SEPTIC CONFLICTS.

TRENCH DRAIN NOTE:
TRENCH DRAINS SHALL BE BG-GRASPOINTNER TRENCH DRAIN, OR APPROVED EQUAL TIED INTO SOAKAWAY PITS VIA 150ø PVC DR28 LEAD AT 1.0% MIN. TRENCH DRAIN SHALL BE c/w SUMP UNIT. EACH LOT SHALL HAVE A REVERSED CROWN TRENCH DRAIN ON PROPERTY LINE (UNLESS OTHERWISE NOTED), SEE DETAILS ON SHEET 3.

RWL NOTE:
ALLOWABLE OVERFLOWS ARE TO BE DIRECTED VIA DOWNSPOUTS TO THE REAR YARD OR SIDE YARD SWALES ON REAR YARD SIDE OF SWALE HIGH POINTS, NO FLOWS SHALL BE DIRECTED TO COUNTY ROADS

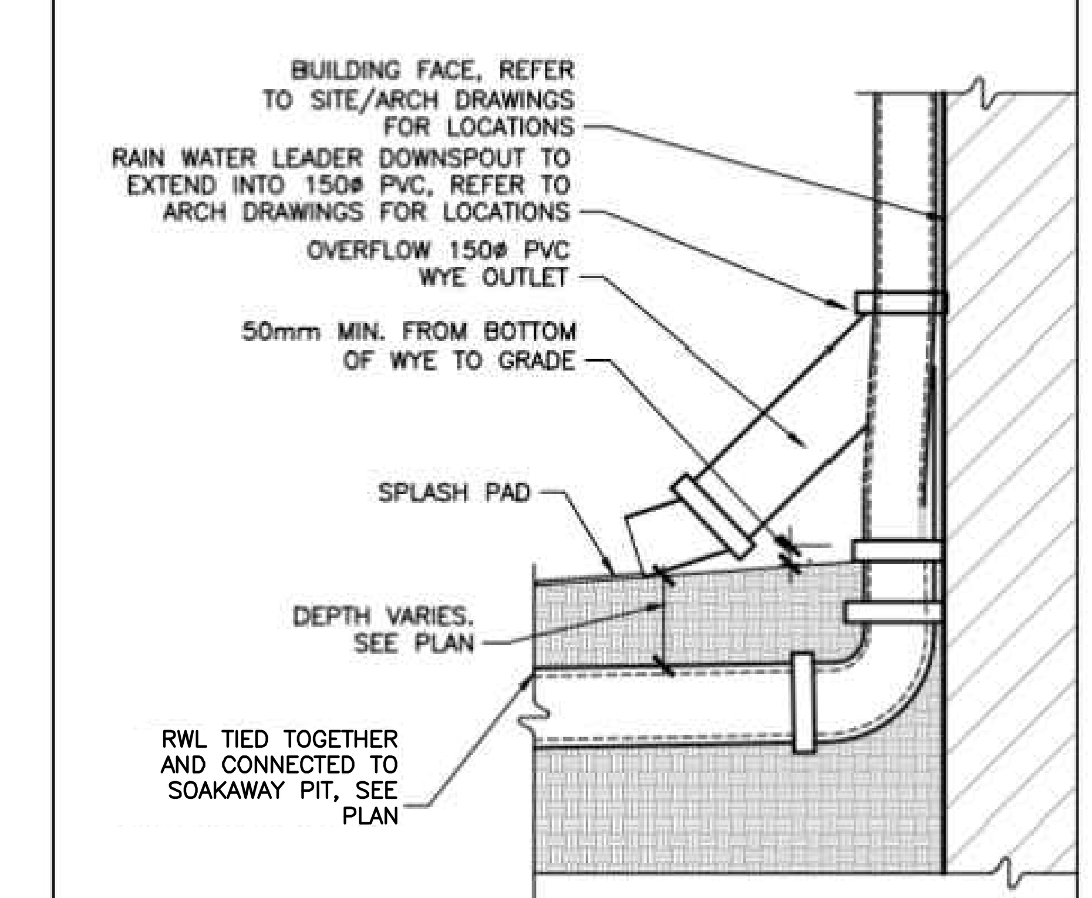
UTILITIES NOTE:
FOR CLARITY, NOT ALL EXISTING UTILITIES MAY BE SHOWN. THE OWNER'S CONTRACTOR IS RESPONSIBLE FOR OBTAINING ALL UTILITY LOCATES PRIOR TO CONSTRUCTION.





MUNICIPALITY OF MIDDLESEX CENTRE HYDRANT COLOUR CODING		
CLASS	RATED CAPACITY	COLOUR
CLASS AA	1500 usgpm (5680 L/min) OR GREATER	LIGHT BLUE
CLASS A	1000–1499 usgpm (3785–5675 L/min)	GREEN
CLASS B	500–999 usgpm (1900–3780 L/min)	ORANGE
CLASS C	500 usgpm (1900 L/min) OR LESS	RED

SEE ROOF LEADER SOAKAWAY PIT DETAIL ON SHEET 1



RWL OUTLET DETAIL

N.T.S.

INFILTRATION RATES FROM GEOTECHNICAL INVESTIGATION ARE LOW AND CLAY SOIL ONSITE MAY NOT INFILTRATE. SBM DOES NOT RECOMMEND USING IT. SOAKAWAY PITS FOR EACH PROPERTY HAVE BEEN SIZED WITH INFILTRATION RATE PROVIDED AND THERE MAY BE A REQUIREMENT FOR A DESIGNED OUTLET TO THE DITCH AS A PRECAUTION TO AVOID FLOODING THE BUILDING FOOTPRINT.

ROAD OCCUPANCY PERMIT NOTE:
ROAD OCCUPANCY PERMIT FOR ALL EXTERNAL WORKS IS REQUIRED.

RESTORATION NOTE:
ALL WORK IN THE ROAD ALLOWANCE SHALL MEET THE MINIMUM SPECIFICATIONS OF THE MUNICIPALITY OF MIDDLESEX CENTRE PUBLIC WORKS & ENGINEERING DEPARTMENT.

FOR GRADING ON ADJACENT LANDS, IF REQUIRED, DEVELOPER SHALL OBTAIN WRITTEN APPROVAL FROM ADJACENT LAND OWNER.

BOULEVARD AREAS AND CONCRETE SIDEWALKS DISTURBED DURING INSTALLATION OF SERVICES SHALL BE RESTORED TO MATCH EX. CONDITION OR SURFACE WORKS NOTES ON SHEET 1, WHICHEVER IS GREATER, ALL AT NO COST TO THE MUNICIPALITY.

ALL CLEARANCES TO ELECTRICAL CONDUCTORS AS SET OUT IN THE CURRENT OBC DIV. B-3.1.19.1 'ELECTRICAL CONDUCTOR CLEARANCES TO BUILDINGS' SHALL BE MAINTAINED

WATERMAIN & SEWER CROSSING NOTE:
1. UNDER PRACTICAL CONDITIONS, WATERMAINS SHALL CROSS ABOVE SEWERS WITH SUFFICIENT VERTICAL SEPARATION TO ALLOW FOR PROPER BEDDING AND STRUCTURAL SUPPORT OF THE WATERMAIN AND SEWER. INSULATE AS PER FIGURE 5.2 (WHERE REQUIRED).
2. WHEN IT IS NOT POSSIBLE FOR THE WATERMAIN TO CROSS ABOVE THE SEWER, THE WATERMAIN PASSING UNDER A SEWER SHALL BE PROTECTED BY:
   - 2.1. PROVIDING A VERTICAL SEPARATION OF AT LEAST 0.5 METRES BETWEEN THE INVERT OF THE SEWER AND THE CROWN OF THE WATERMAIN;
   - 2.2. PROVIDING ADEQUATE STRUCTURAL SUPPORT FOR THE SEWERS TO PREVENT EXCESSIVE DEFLECTION OF JOINTS AND SETTLING; AND
   - 2.3. ENSURING THAT THE LENGTH OF WATER PIPE SHALL BE CENTERED AT THE POINT OF CROSSING SO THAT THE JOINTS WILL BE EQUIDISTANT AND AS FAR AS POSSIBLE FROM THE SEWER.

REFERENCE: JUNE 2012 MINISTRY OF THE ENVIRONMENT'S 'WATERMAIN DESIGN CRITERIA FOR FUTURE ALTERATION AUTHORIZED UNDER A DRINKING WATER WORKS PERMIT'

REFER TO NOTES, LEGEND, AND DETAILS ON SHEET 1 & 3

PIPE CROSSINGS & VERTICAL CLEARANCES

CROSSING No.	SEWER/WATERMAIN ELEVATIONS								VERTICAL CLEARANCES	*VERTICAL OFFSET
CR1	25mm	WM	INV.	273.17	375mm	STM	OBV.	272.94	0.23	YES*

TITLE
DEVELOPMENT ENGINEERING PLAN – LOTS 1-5 & 17-19
BALLYMOTE SUBDIVISION
21488 HIGHBURY AVE N
BALLYMOTE, ON

PROJECT No. SBM-21-0716
SHEET No. 2A
PLAN FILE No. –

GRADING CERTIFICATE:

I HEREBY CERTIFY THAT THE PROPOSED GRADING AND APPURTENANT DRAINAGE WORKS COMPLY WITH SOUND ENGINEERING DESIGN AND THAT THE PROPOSED GRADING IS COMPATIBLE WITH EXISTING DRAINAGE PATTERNS ON AND ACROSS THESE LANDS AND THE ADJOINING LANDS OR APPLICABLE MUNICIPAL BY-LAWS.

GRADING NOTES:

1. EXISTING GRADES AND DRAINAGE OF ABUTTING LANDS IS NOT TO BE DISTURBED.
2. LOCALIZED SURFACE DRAINAGE FROM ABUTTING PROPERTIES TO BE DEVELOPED IN THE FUTURE MAY BE DISCHARGED ONTO THE PROPOSED LOTS IN THIS SUBDIVISION.
3. BASEMENT OPENINGS TO BE MINIMUM 300mm ABOVE THE CENTRELINE OF ROAD UNLESS OTHERWISE APPROVED BY THE DIRECTOR OF PUBLIC WORK AND ENGINEERING.
4. GROUND ELEVATIONS AT BUILDINGS ABUTTING OVERLAND FLOW ROUTES ARE TO BE 300mm ABOVE OVERLAND FLOW ROUTE ELEVATIONS.
5. GROUND ELEVATIONS AT BUILDING OPENING ABUTTING OVERLAND FLOW ROUTES ARE TO TO BE 450mm ABOVE OVERLAND FLOW ROUTE ELEVATIONS.
6. SUMP PUMP DISCHARGE MUST BE DIRECTED AWAY FROM DRIVEWAYS AND SIDEWALKS AND MUST NOT EXTEND BEYOND PROPERTY LIMITS. NO SANITARY SEWER CONNECTIONS PERMITTED.
7. A MINIMUM OF 150mm (6") FROM THE TOP OF FOUNDATION TO THE FINISHED GRADE OUTSIDE THE BUILDING MUST BE PROVIDED, TYPICAL.
8. RETAINING WALLS, 1000mm OR GREATER, & GUARD RAILS ON TOP (IF REQUIRED) ARE TO BE DESIGNED BY AND CONSTRUCTED TO THE SPECIFICATIONS OF A REGISTERED PROFESSIONAL ENGINEER IN ACCORDANCE WITH THE ONTARIO BUILDING CODE.
9. THE MIN. TOP OF FOUNDATION ELEVATION, UNDERSIDE OF FOOTING ELEVATION, BASEMENT WINDOW SILL ELEVATION, ETC. ARE TO BE CONFIRMED BY THE CONTRACTOR IN CONSULTATION WITH THE BUILDING DESIGNER, BASED ON THE FINISHED FLOOR ELEVATION PROVIDED. CONTACT STRIK, BALDINELLI, MONIZ LTD. (SBM) FOR CLARIFICATION, IF REQUIRED.

UNLESS OTHERWISE NOTED ON THE PLANS, GEOTEXTILE SHALL BE NON-WOVEN TO MEET CLASS 2-OPSS 1860.07.02 (I.E. TERRAFIX 270R, OR APPROVED EQUAL) WITH 300mm MIN. OVERLAPS.

ALL WATERMAIN CONSTRUCTION TO CONFORM TO THE CURRENT STANDARDS AND SPECIFICATIONS OF THE MUNICIPALITY OF MIDDLESEX CENTRE PUBLIC WORKS & ENGINEERING DEPARTMENT. WHERE WATERMAIN/SERVICE IS LESS THAN 2.1m BELOW ROAD GRADE OR 1.1m BELOW THE BOTTOM OF DITCH, WHICHEVER IS GREATER AND SHALL NOT BE LESS THAN 1.5m COVER (EVEN TEMPORARY CONDITIONS), THE WATERMAIN/SERVICE SHALL BE ADEQUATELY INSULATED OVER THE AFFECTED LENGTH AS PER THE MUNICIPALITY OF MIDDLESEX CENTRE FIGURE 5.2.

SILT FENCE TO BE CONSTRUCTED ON PROPERTY LINE. LINE WORK IS NOT SHOWN FOR CLARITY.

OWNER'S CONTRACTOR SHALL BE RESPONSIBLE FOR REGULAR MONITORING & CLEANUP OF TRACKED MUD/DEBRIS ON ADJACENT LANDS & PUBLIC ROADS TO THE SATISFACTION OF THE ENGINEER/MUNICIPALITY OF MIDDLESEX CENTRE.

OWNER'S CONTRACTOR SHALL TAKE ALL REASONABLE MEASURES TO AVOID MIXING TOPSOIL WITH SUBSOIL, WHERE REQUIRED FOR REUSE ON-SITE.

TOPSOIL STOCKPILE SIZES/LOCATIONS TO BE DETERMINED IN THE FIELD. SILT FENCE SHALL BE CONSTRUCTED AT TOE OF DOWNGRADE EDGES OF TOPSOIL STOCKPILE

ALL NATIVE FILL PLACED SHALL MEET THE REQUIREMENTS FOR ENGINEERED FILL, COMPACTED TO 100% SPMDD OR AS OUTLINED IN THE GEOTECHNICAL REPORT.

INFILTRATION RATES FROM GEOTECHNICAL INVESTIGATION ARE LOW AND CLAY SOIL ONSITE MAY NOT INFILTRATE. SBM DOES NOT RECOMMEND USING IT. SOAKWAY PITS FOR EACH PROPERTY HAVE BEEN SIZED WITH INFILTRATION RATE PROVIDED AND THERE MAY BE A REQUIREMENT FOR A DESIGNED OUTLET TO THE DITCH AS A PRECAUTION TO AVOID FLOODING THE BUILDING FOOTPRINT.

FILTER FABRIC AND STRAW BALE BARRIERS SHALL BE INSTALLED AND MAINTAINED IN EXISTING DICB's FOR DURATION OF PROJECT UNTIL SURFACES ARE PAVED AND BOULEVARDS ARE SODDED.

SITE PREPARATION NOTE:
THIS PLAN HAS BEEN PREPARED TO IDENTIFY REMOVALS, EROSION & SEDIMENT CONTROL MEASURES AND TEMPORARY CONSTRUCTION WORKS FOR THE BENEFIT OF THE OWNER'S CONTRACTOR IN ADVANCE OF SERVICING WORKS. IT IS NOT INTENDED TO IDENTIFY PERMANENT GRADING PATTERNS.

DISPOSAL NOTE:
ALL ITEMS NOTED AS "TO BE REMOVED" SHALL BE DISCARDED OFF-SITE AT AN APPROVED FACILITY.

OWNER'S CONTRACTOR TO CLEAR AND GRUB SITE PRIOR TO CONSTRUCTION AND DISPOSE OF ALL DEBRIS AND EXCESS FILL/TOPSOIL OFF-SITE AT AN APPROVED FACILITY.

SUMP PUMP AND DRAIN LOCATIONS ARE SHOWN FOR SCHEMATIC PURPOSES ONLY. REFER TO ARCHITECTS PLANS FOR SUMP PUMP DESIGN.

SERVICE STUBS TO BE CAPPED AT 1.0m O/S FROM BUILDING ENVELOPE FOR CONNECTION ONCE BUILDING SERVICES ARE INSTALLED.

**EXISTING MUNICIPAL DRAIN INVERTS, EXACT LOCATION, AND PIPE SIZE TRANSITION LOCATION UNKNOWN. TO BE DETERMINED ON SITE PRIOR TO INSTALLATION OF PROPOSED WATER SERVICES. WATER SERVICES TO BE VERTICALLY DEFLECTED AS REQUIRED FOR 0.50m MINIMUM VERTICAL SEPARATION UNDER STORM OR 0.23m MINIMUM VERTICAL SEPARATION OVER STORM. INSULATE AS REQUIRED. SEPTIC DESIGNER TO BE CONTACTED FOR SEPTIC CONFLICTS.

WINDOW WELL NOTE:
ALL WINDOW WELLS SHALL BE PROJECTED UP TO ELEVATION 275.15m OR 150mm ABOVE FINISHED GRADE MIN, WHICHEVER IS GREATER, TO PROTECT AGAINST POTENTIAL FLOODING

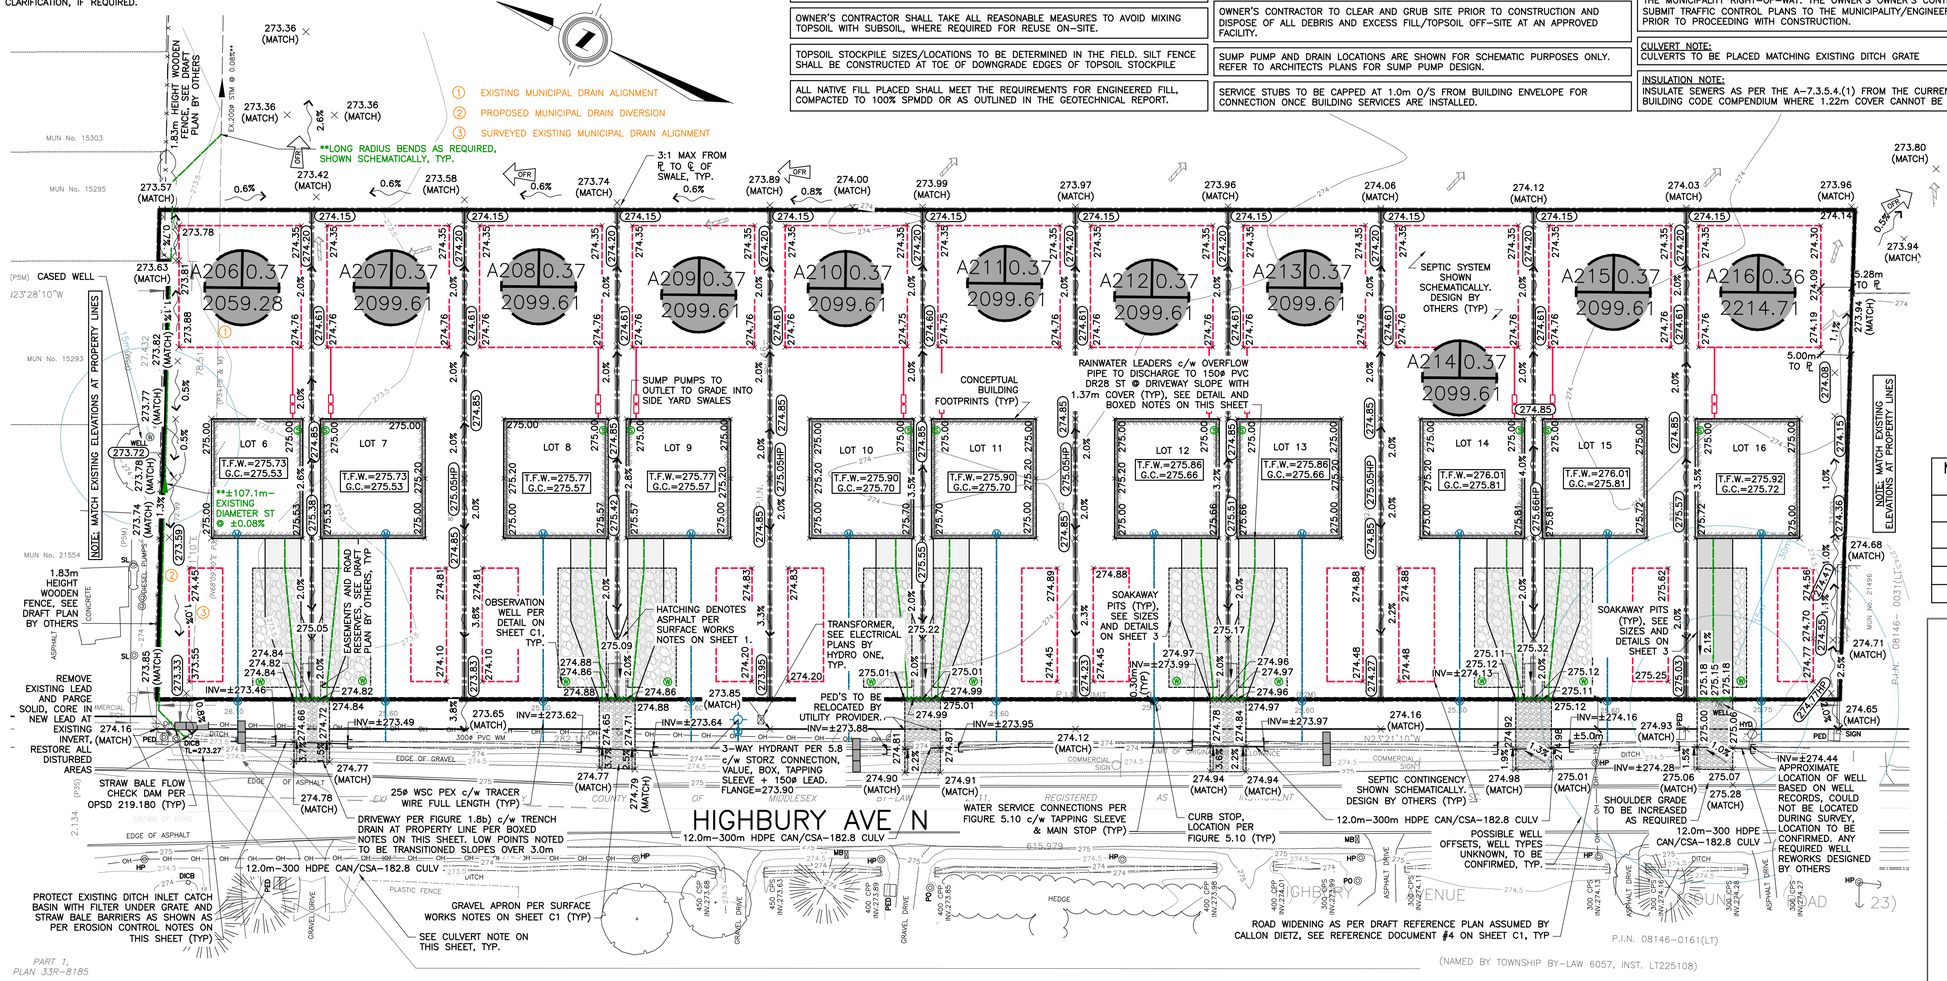
OVERFLOW PIPE FROM THE ROOF LEADER TO SPLASH PAD AS PER DETAIL ON THIS SHEET.

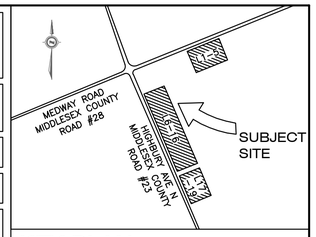
SOAKAWAY PIT DESIGNED IN ACCORDANCE WITH SECTION 4.5.6 OF M.E.C.P. STORMWATER MANAGEMENT PLANNING AND DESIGN MANUAL (SWMP)

THE OWNER'S CONTRACTOR SHALL PROVIDE TRAFFIC CONTROL MEASURES IN COMPLIANCE WITH THE ONTARIO TRAFFIC MANUAL BOOK 7 FOR ALL WORKS WITHIN THE MUNICIPALITY RIGHT-OF-WAY. THE OWNER'S OWNER'S CONTRACTOR SHALL SUBMIT TRAFFIC CONTROL PLANS TO THE MUNICIPALITY/ENGINEER FOR REVIEW PRIOR TO PROCEEDING WITH CONSTRUCTION.

CULVERT NOTE:
CULVERTS TO BE PLACED MATCHING EXISTING DITCH GRATE

INSULATION NOTE:
INSULATE SEWERS AS PER THE A-7.3.5.4.(1) FROM THE CURRENT ONTARIO BUILDING CODE COMPENDIUM WHERE 1.22m COVER CANNOT BE PROVIDED.





KEY PLAN

CONCESSION 6
IN THE
(GEOGRAPHIC TOWNSHIP OF LONDON)
MUNICIPALITY OF MIDDLESEX CENTRE
COUNTY OF MIDDLESEX

SITE BENCHMARK:

MONUMENT TYPE: BOLT (BM02-50)

LOCATION: BRICK PRIVACY WALL ON THE SOUTHWEST CORNER OF SUNNINGDALE ROAD EAST AND SOUTH WENIGE DRIVE. BOLT SET IN THE NORTH FACE OF THE WALL, 0.21m BELOW THE BRICK AND 0.71m WEST OF THE 45 DEGREE ANGLE OF THE WALL.

GEODETIC ELEVATION: 259.153 (CGVD28, 1978)

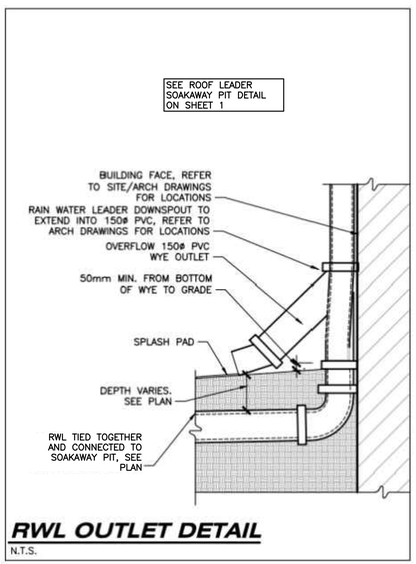
MONUMENT TYPE: BOLT (BM02-43)

LOCATION: CONCRETE BOX CULVERT CROSSING SUNNINGDALE ROAD EAST, 320m WEST OF THE CENTRELINE OF HIGHBURY AVENUE NORTH. BOLT SET IN THE EAST FACE ON THE NORTH SIDE OF SUNNINGDALE ROAD EAST, 0.12m SOUTH OF THE NORTHEAST CORNER AND 0.12m DOWN FROM THE TOP.

GEODETIC ELEVATION: 260.902 (CGVD28, 1978)

(CONTRACTOR TO CONFIRM BENCHMARK ELEVATIONS)

MUNICIPALITY OF MIDDLESEX CENTRE HYDRANT COLOUR CODING		
CLASS	RATED CAPACITY	COLOUR
CLASS AA	1500 usgpm (5680 L/min) OR GREATER	LIGHT BLUE
CLASS A	1000-1499 usgpm (3785-5675 L/min)	GREEN
CLASS B	500-999 usgpm (1900-3780 L/min)	ORANGE
CLASS C	500 usgpm (1900 L/min) OR LESS	RED



RWL OUTLET DETAIL
N.T.S.

ROAD OCCUPANCY PERMIT NOTE:
ROAD OCCUPANCY PERMIT FOR ALL EXTERNAL WORKS IS REQUIRED.

RESTORATION NOTE:
ALL WORK IN THE ROAD ALLOWANCE SHALL MEET THE MINIMUM SPECIFICATIONS OF THE MUNICIPALITY OF MIDDLESEX CENTRE PUBLIC WORKS & ENGINEERING DEPARTMENT.

FOR GRADING ON ADJACENT LANDS, IF REQUIRED, DEVELOPER SHALL OBTAIN WRITTEN APPROVAL FROM ADJACENT LAND OWNER.

BOULEVARD AREAS AND CONCRETE SIDEWALKS DISTURBED DURING INSTALLATION OF SERVICES SHALL BE RESTORED TO MATCH EX. CONDITION OR SURFACE WORKS NOTES ON SHEET 1, WHICHEVER IS GREATER, ALL AT NO COST TO THE MUNICIPALITY.

ALL CLEARANCES TO ELECTRICAL CONDUCTORS AS SET OUT IN THE CURRENT OBC DIV. B-3.1.19.1 'ELECTRICAL CONDUCTOR CLEARANCES TO BUILDINGS' SHALL BE MAINTAINED

WATERMAIN & SEWER CROSSING NOTE:
1. UNDER PRACTICAL CONDITIONS, WATERMAINS SHALL CROSS ABOVE SEWERS WITH SUFFICIENT VERTICAL SEPARATION TO ALLOW FOR PROPER BEDDING AND STRUCTURAL SUPPORT OF THE WATERMAIN AND SEWER. INSULATE AS PER FIGURE 5.2 (WHERE REQUIRED).
2. WHEN IT IS NOT POSSIBLE FOR THE WATERMAIN TO CROSS ABOVE THE SEWER, THE WATERMAIN PASSING UNDER A SEWER SHALL BE PROTECTED BY:
   2.1. PROVIDING A VERTICAL SEPARATION OF AT LEAST 0.5 METRES BETWEEN THE INVERT OF THE SEWER AND THE CROWN OF THE WATERMAIN;
   2.2. PROVIDING ADEQUATE STRUCTURAL SUPPORT FOR THE SEWERS TO PREVENT EXCESSIVE DEFLECTION OF JOINTS AND SETTLING; AND
   2.3. ENSURING THAT THE LENGTH OF WATER PIPE SHALL BE CENTERED AT THE POINT OF CROSSING SO THAT THE JOINTS WILL BE EQUIDISTANT AND AS FAR AS POSSIBLE FROM THE SEWER.

REFERENCE: JUNE 2012 MINISTRY OF THE ENVIRONMENT'S 'WATERMAIN DESIGN CRITERIA FOR FUTURE ALTERATION AUTHORIZED UNDER A DRINKING WATER WORKS PERMIT'

STORM SERVICING NOTE:
NO BUILDING DRAIN (SUMP/WEEPING TILE/RAIN WATER LEADER) CONNECTIONS WILL BE PERMITTED INTO THE SANITARY SEWERS.

UTILITIES NOTE:
FOR CLARITY, NOT ALL EXISTING UTILITIES MAY BE SHOWN. THE OWNER'S CONTRACTOR IS RESPONSIBLE FOR OBTAINING ALL UTILITY LOCATES PRIOR TO CONSTRUCTION.

OWNER'S CONTRACTOR SHALL SUPPORT ALL EXISTING UTILITIES AS REQUIRED DURING THE INSTALLATION OF SERVICES TO THE SATISFACTION OF THE UTILITY OWNER AT NO EXTRA COST TO THE CONTRACT.

ALL SUMP PIT CONFIGURATIONS SHALL MEET, AT MINIMUM, OBC SECTION 7. ALL PUMPS ARE TO INCLUDE A CHECK VALVE.

BOULEVARD AREAS AND CONCRETE SIDEWALKS DISTURBED DURING INSTALLATION OF SERVICES SHALL BE RESTORED TO MATCH EX. CONDITION OR SURFACE WORKS NOTES ON SHEET 1, WHICHEVER IS GREATER, ALL AT NO COST TO THE MUNICIPALITY.

ALL PROP WATER METERS ARE c/w DOUBLE CHECK VALVE ASSEMBLIES (DCVA) FOR PREMISE ISOLATION

SEDIMENT AND EROSION CONTROL MEASURES MAY ONLY BE REMOVED UPON STABILIZATION OF CONTRIBUTING CATCHMENT AREA AND SUBJECT TO APPROVAL OF ENGINEER/MUNICIPALITY OF MIDDLESEX CENTRE.

STORM DRAINAGE NOTE:
STORM DRAINAGE MAY TEMPORARILY NEED TO BE CONTROLLED AND PUMPED FROM STORM SEWER SYSTEM. ANY SUCH TEMPORARY MEASURES SHALL BE CONDUCTED AT NO EXTRA COST TO THE CONTRACT AND BE BASED UPON THE OWNER'S CONTRACTOR'S WATER CONTROL PLANS. WHICH MUST BE APPROVED BY THE CONTRACT ADMINISTRATOR/ENGINEER PRIOR TO CONSTRUCTION.

OWNER'S CONTRACTOR SHALL BE RESPONSIBLE FOR TEMPORARY CONSTRUCTION MEASURES SUCH AS, BUT NOT LIMITED TO, PIPE COVER AT NO ADDITIONAL CHARGE TO THE CONTRACT.

TRENCH DRAIN NOTE:
TRENCH DRAINS SHALL BE BG-GRASPOINTNER TRENCH DRAIN, OR APPROVED EQUAL, TIED INTO SOAKAWAY PITS VIA 150ø PVC DR28 LEAD AT 1.0% MIN. TRENCH DRAIN SHALL BE c/w SUMP UNIT. EACH LOT SHALL HAVE A REVERSED CROWN TRENCH DRAIN ON PROPERTY LINE (UNLESS OTHERWISE NOTED), SEE DETAILS ON SHEET 3.

RWL NOTE:
ALLOWABLE OVERFLOWS ARE TO BE DIRECTED VIA DOWNSPOUTS TO THE REAR YARD OR SIDE YARD SWALES ON REAR YARD SIDE OF SWALE HIGH POINTS, NO FLOWS SHALL BE DIRECTED TO COUNTY ROADS

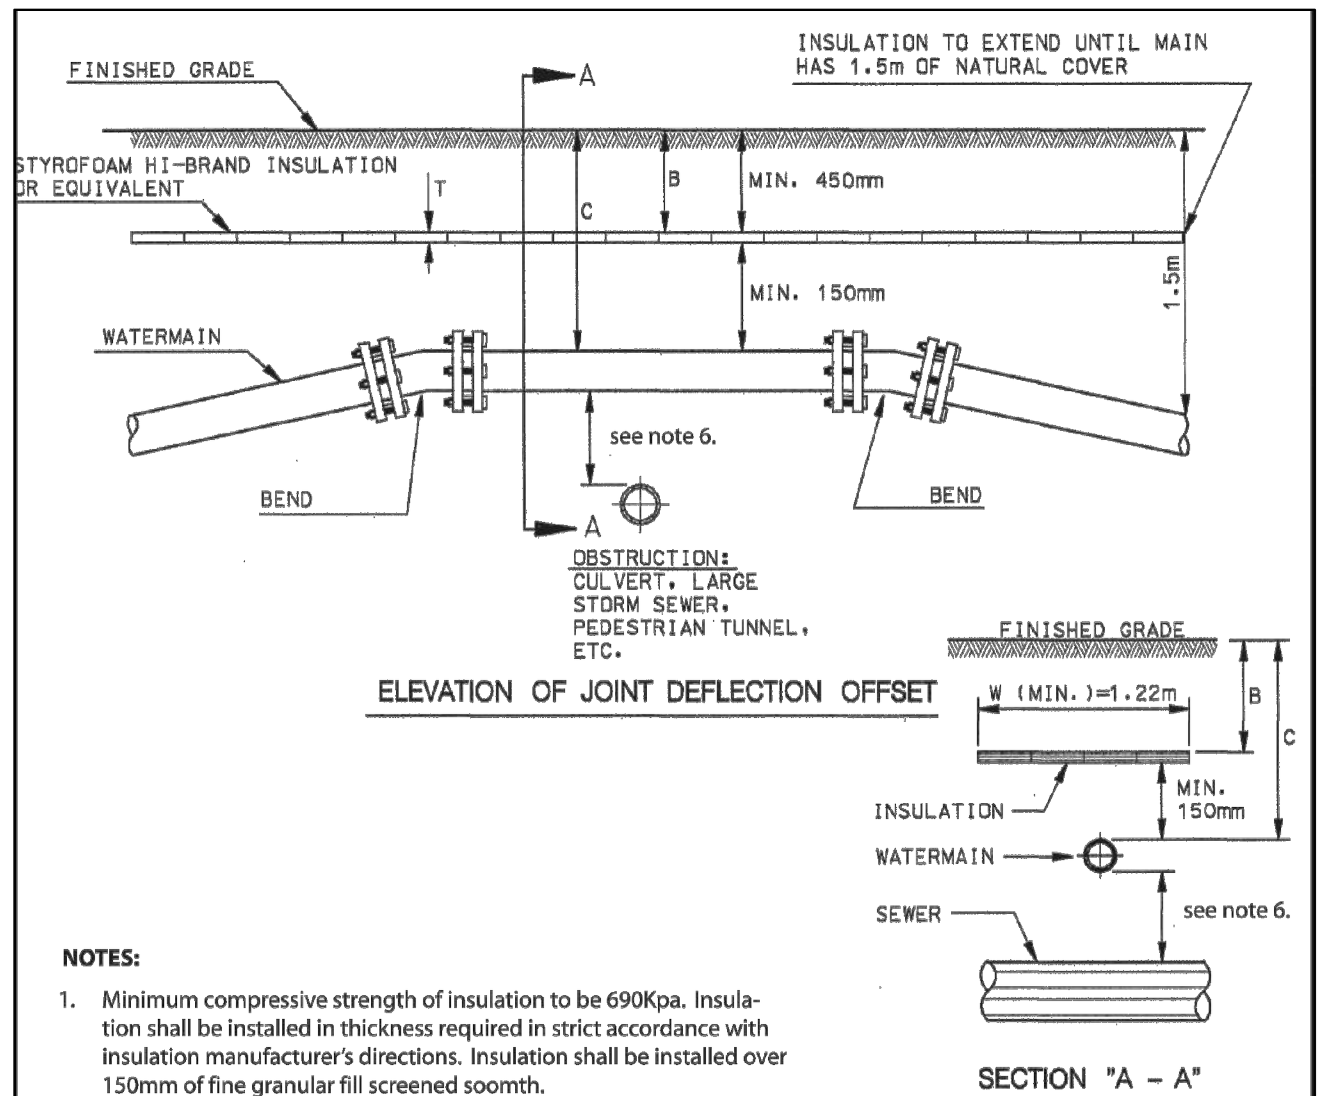
middlesex centre — in the centre of it all

STANDARD FOR SINGLE AND DOUBLE DRIVEWAY ENTRANCE (RURAL)

DATE: 2017-04 | FIGURE 1.8b)



NOTES:

1. Minimum compressive strength of insulation to be 690Kpa. Insulation shall be installed in thickness required in strict accordance with insulation manufacturer's directions. Insulation shall be installed over 150mm of fine granular fill screened soomth.
2. Butt insulation tightly together without gaps. Stagger end joints if more than one layer used.
3. To hold in place skewer insulation board to ground with 200mm hardwood skewers. Minimum 6mm dia., and 200mm long. 2 skewers per board.
4. If 2 layers of insulation are used skewer only the top layer through the first layer using a skewer 150mm longer than the combined thickness of the 2 layers of insulation. Insert skewers at approximately 30 degree angle.
5. Place at least 200mm of fine granular fill over insulation before using compaction equipment.
6. Minimum Clearance as per MOECC Procedure F-6-1.

INSULATION THICKNESS		INSULATION WIDTH	
C(m)	T(mm)	B(m)	W(m)
0.60	75	0.45	2.44
0.75	75	0.60	1.83
0.90	50	0.75	1.54
1.09	50	0.90	1.22
1.20	25		
1.35	25		

All dimensions are in millimetres unless shown otherwise.

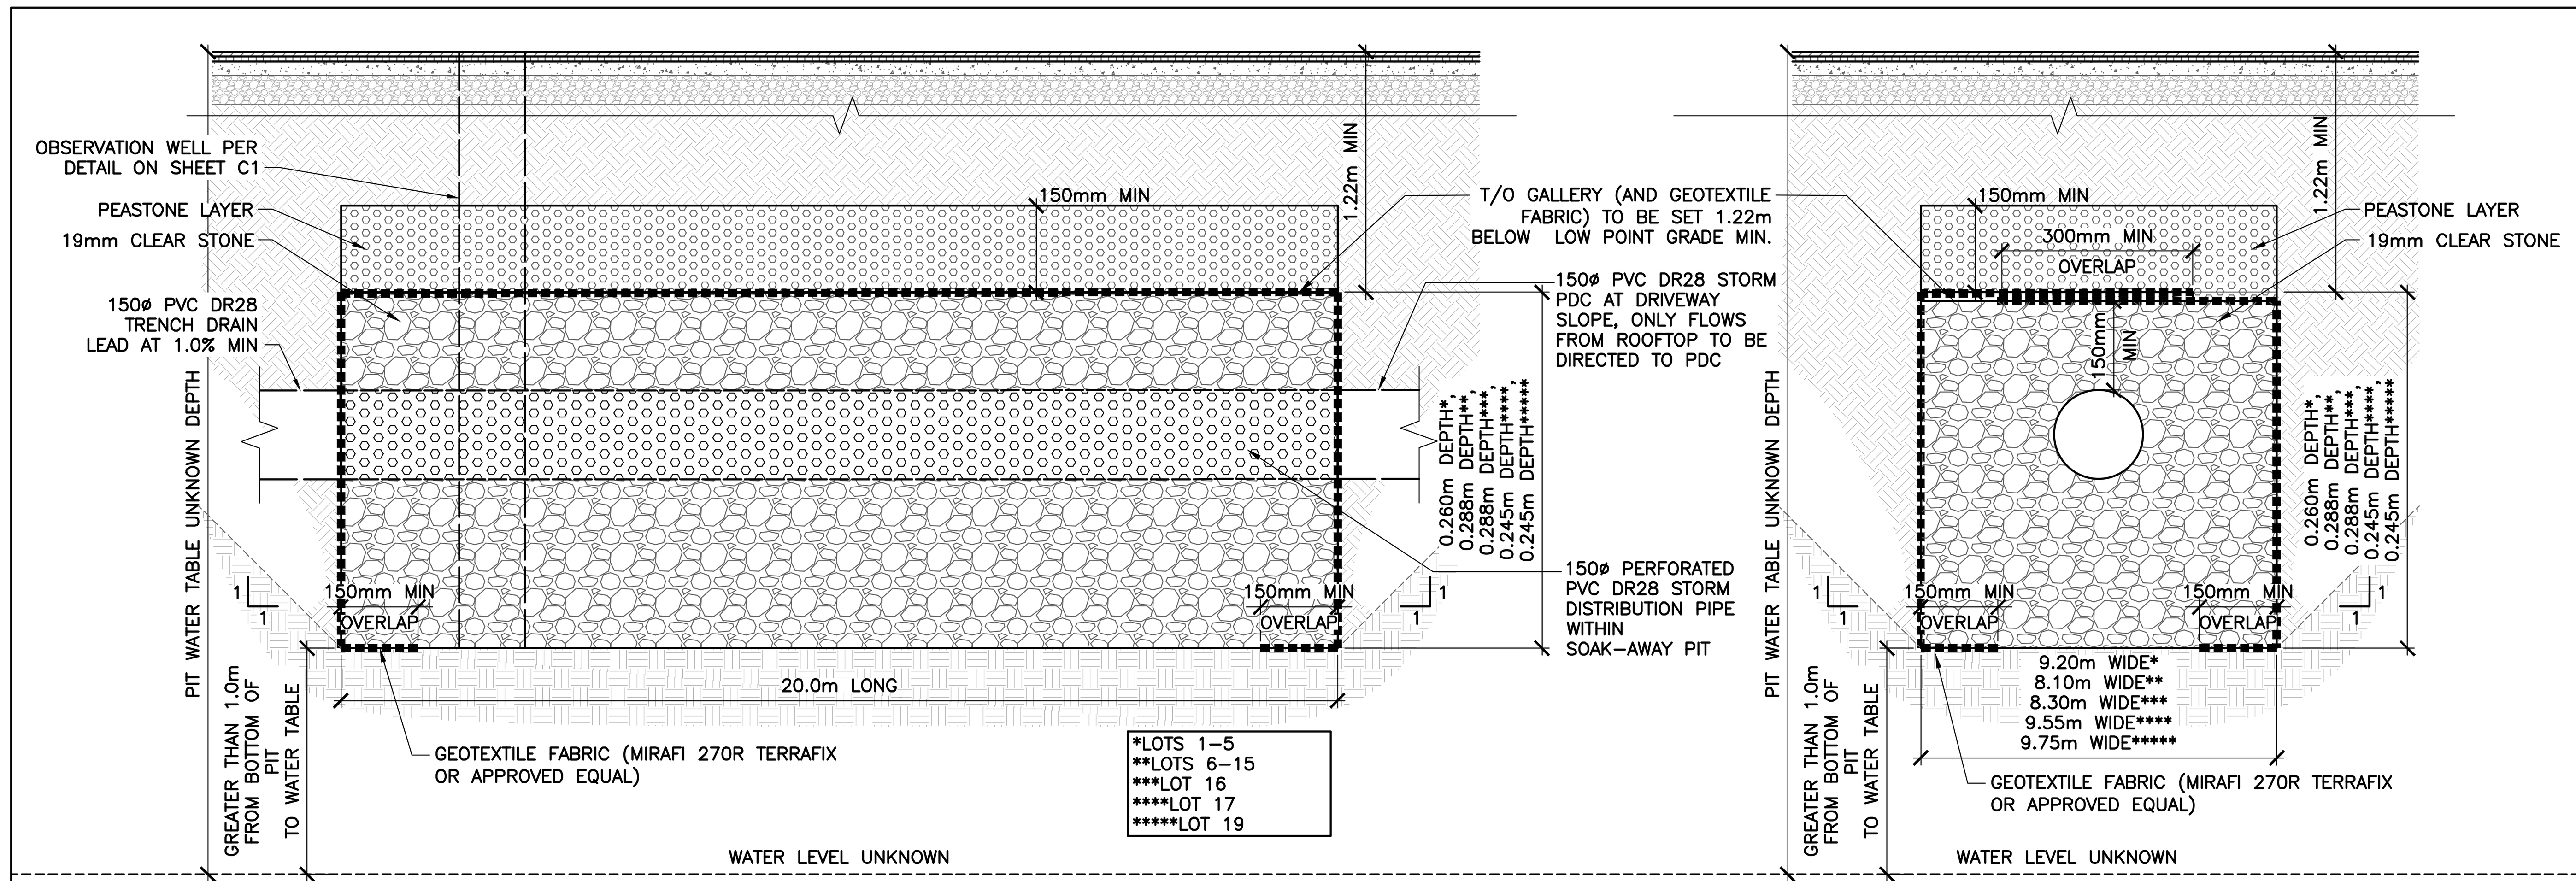
INSULATION STANDARD FOR SHALLOW MAINS AND OFFSETS

DATE: 2017-04 | FIGURE 5.2

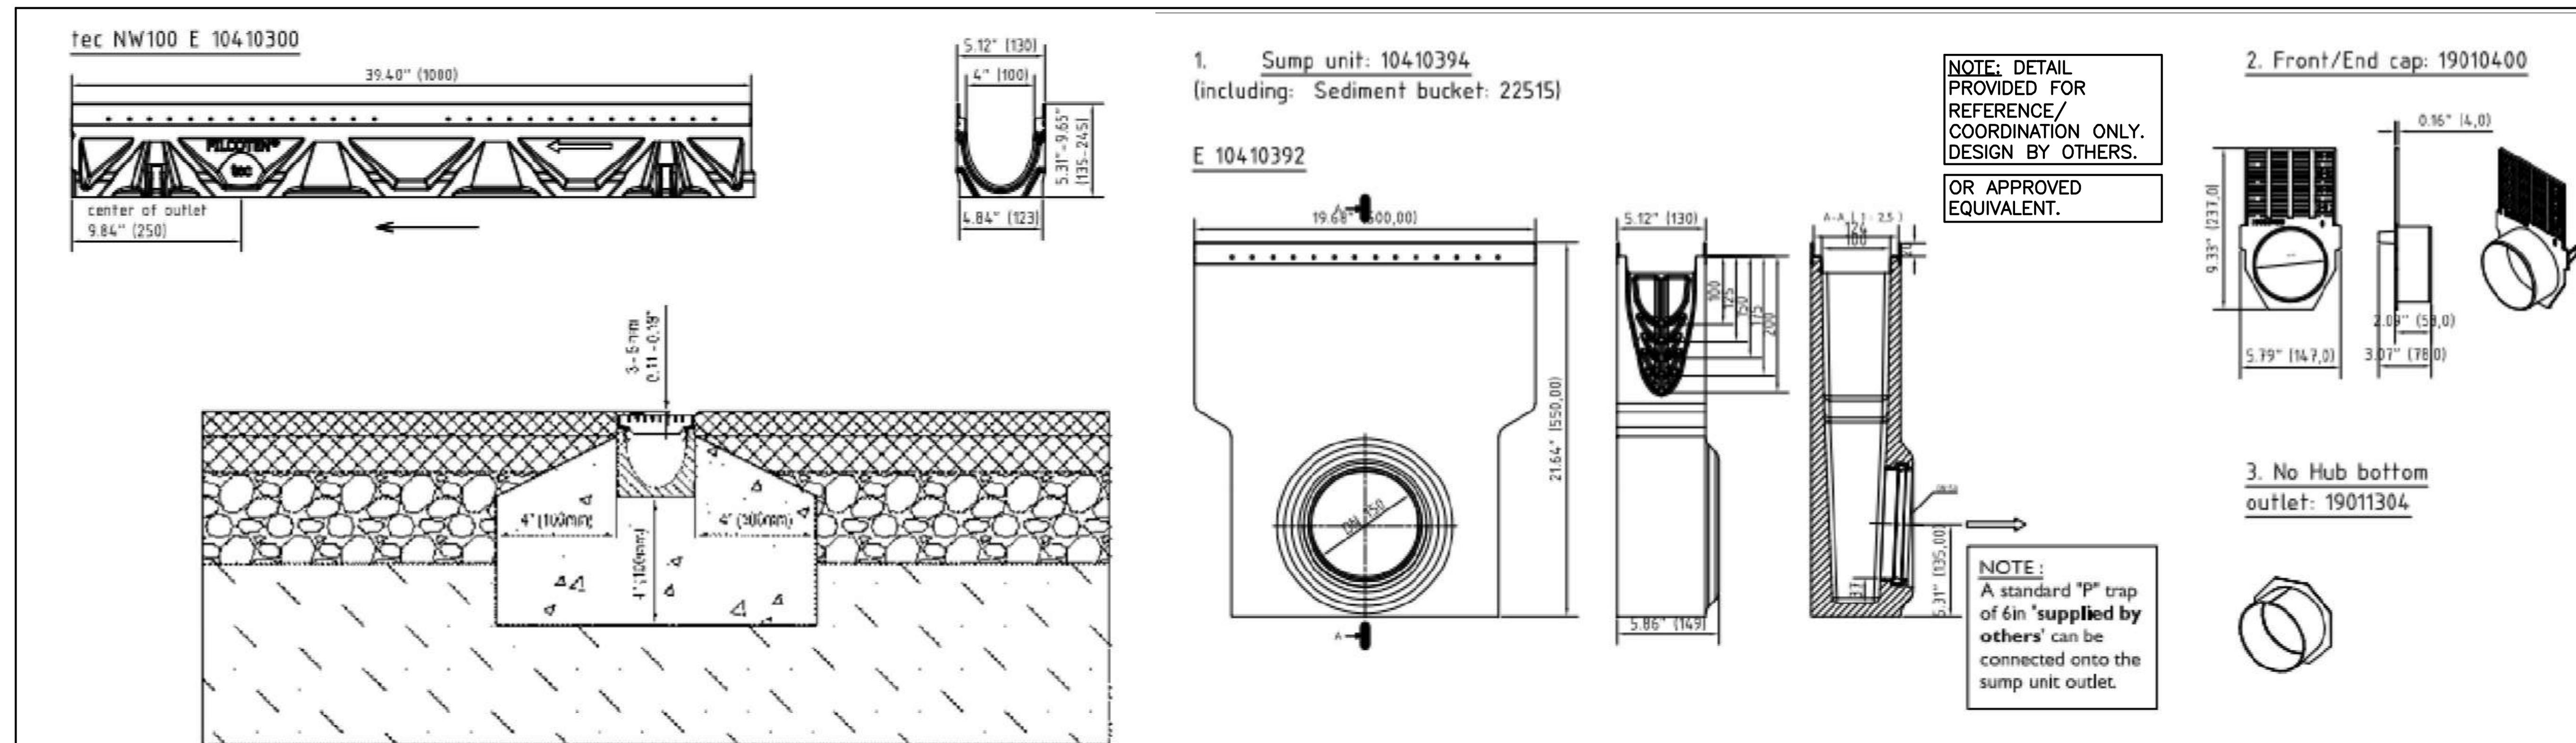


THE ELEVATION OF THE GROUNDWATER TABLE IS UNKNOWN CONTRACTOR/GEOTECHNICAL ENGINEER TO CONFIRM GROUND WATER ELEVATION PRIOR TO CONSTRUCTION

NOTES:
1. REFER TO SHEET 2A & 2B FOR STORM SEWER LOCATION
2. REFER TO SHEET 2A & 2B FOR EXTENT OF SOAKAWAY PITS

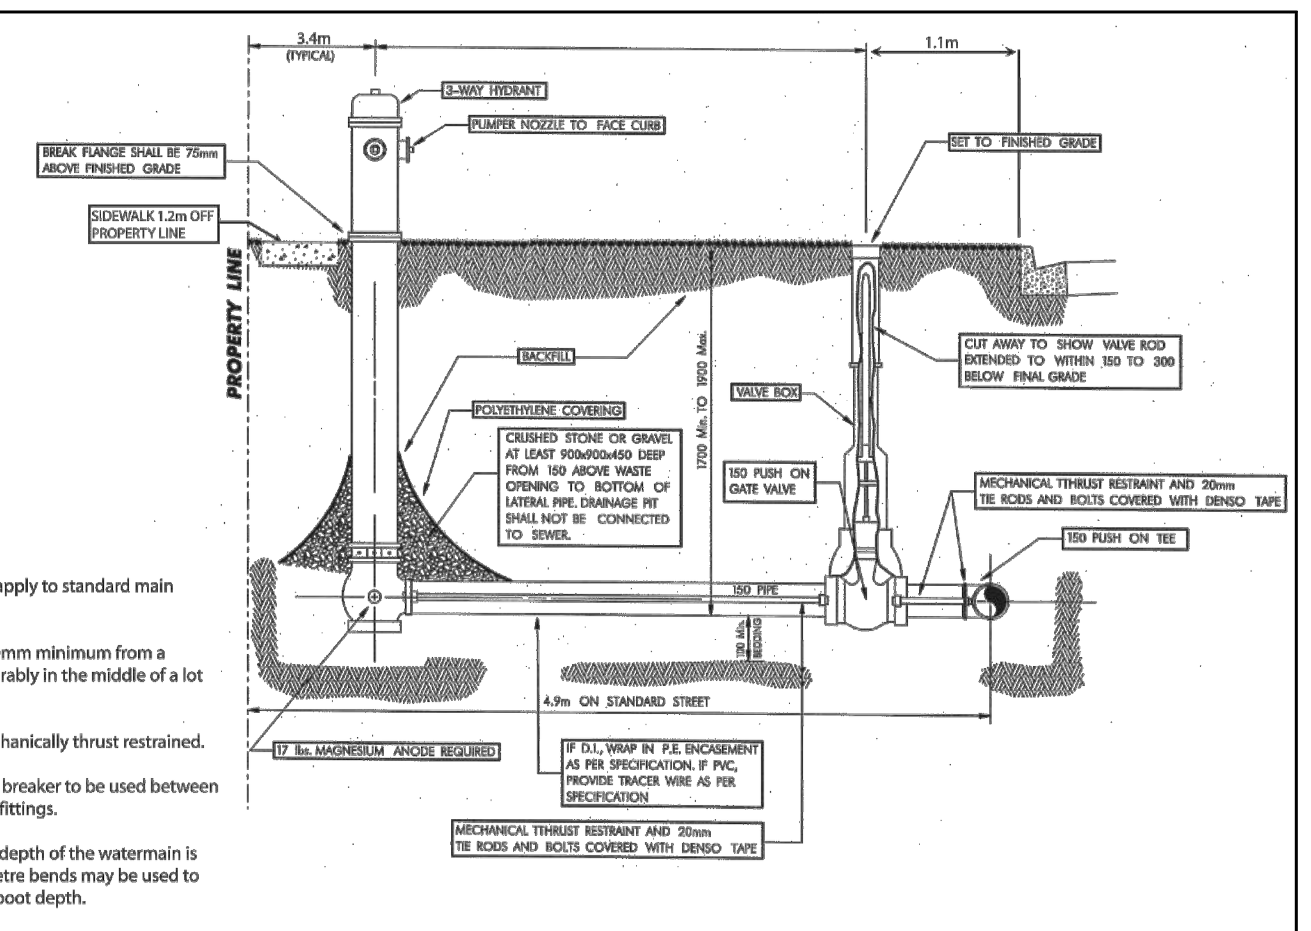
SOAKAWAY PIT DETAIL

N.T.S.



TRENCH DRAIN DETAILS

N.T.S.



NOTES:

1. Dimensions given apply to standard main location.
2. Hydrant to be 1500mm minimum from a driveway and preferably in the middle of a lot frontage.
3. All joints to be mechanically thrust restrained.
4. Polyethylene bond breaker to be used between crushed stone and fittings.
5. In cases where the depth of the watermain is greater than 1.9 metre bends may be used to offset the hydrant boot depth.
6. The use of 300mm, minimum, fire hydrant barrel extension may also be used.

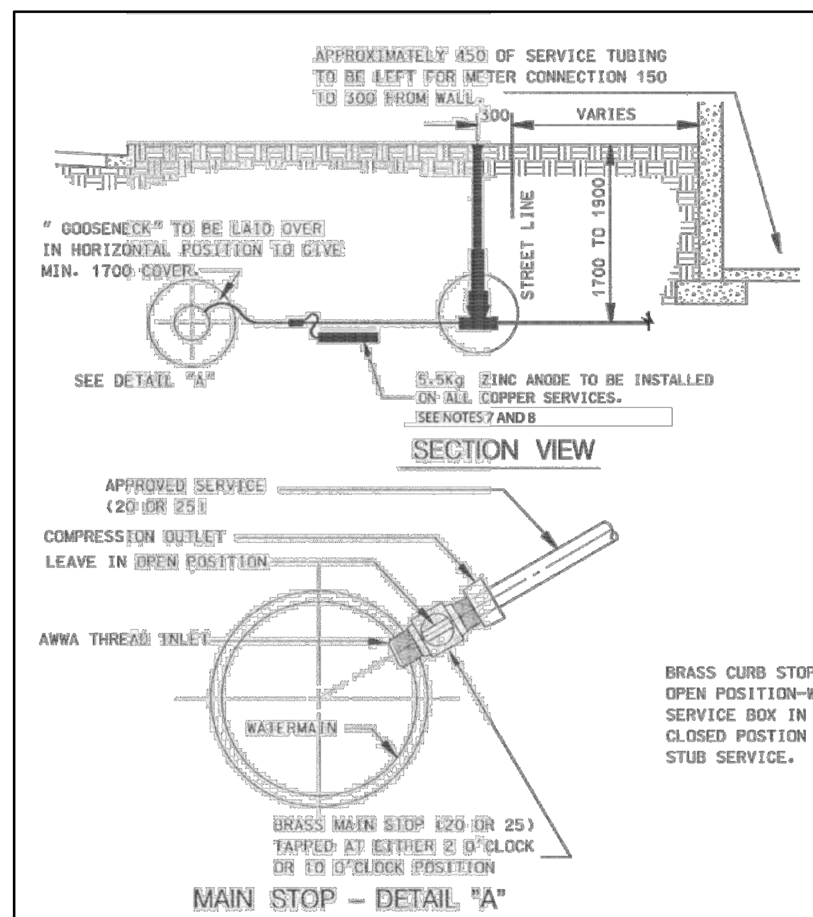
All dimensions are in millimetres unless otherwise shown.

FIGURE 5.8

middlesex centre — in the centre of it all

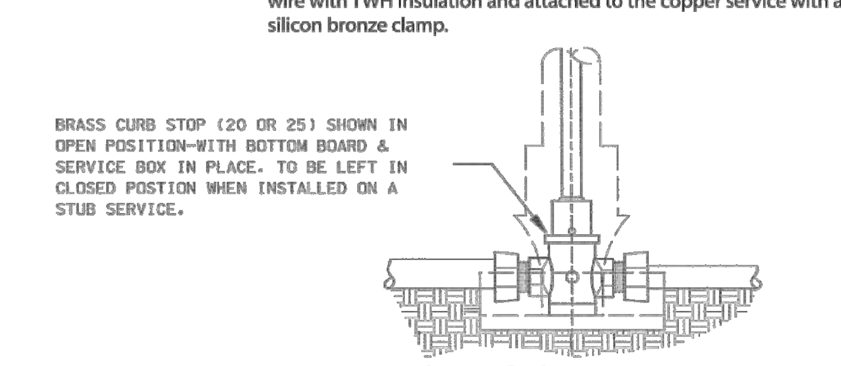
HYDRANT AND VALVE INSTALLATION

DATE: 2017-04 | FIGURE 5.8



NOTES:

1. Main stops shall be spaced on main not closer than 450mm. If main is PVC taps shall not be on a common line parallel to the axis of the pipe and no closer than 450mm from the spigot end of the pipe.
2. Approved service tubing Rehau Municipex . For material on private property refer to Ontario Building Code.
3. Service tubing to be the same material from the main to the water meter.
4. Any joint made in service tubing shall be made with approved couplings.
5. No joints shall be made under pavement.
6. Approved service saddles must be used to tap 25mm main stops into 100mm pipe and all main stops into PVC pipe.
7. 5.5Kg zinc anode must conform to ASTM B418-73 Type II.
8. Anode must be supplied with a 3m AWG 12 gauge solid copper lead wire with TWH insulation and attached to the copper service with a silicon bronze clamp.



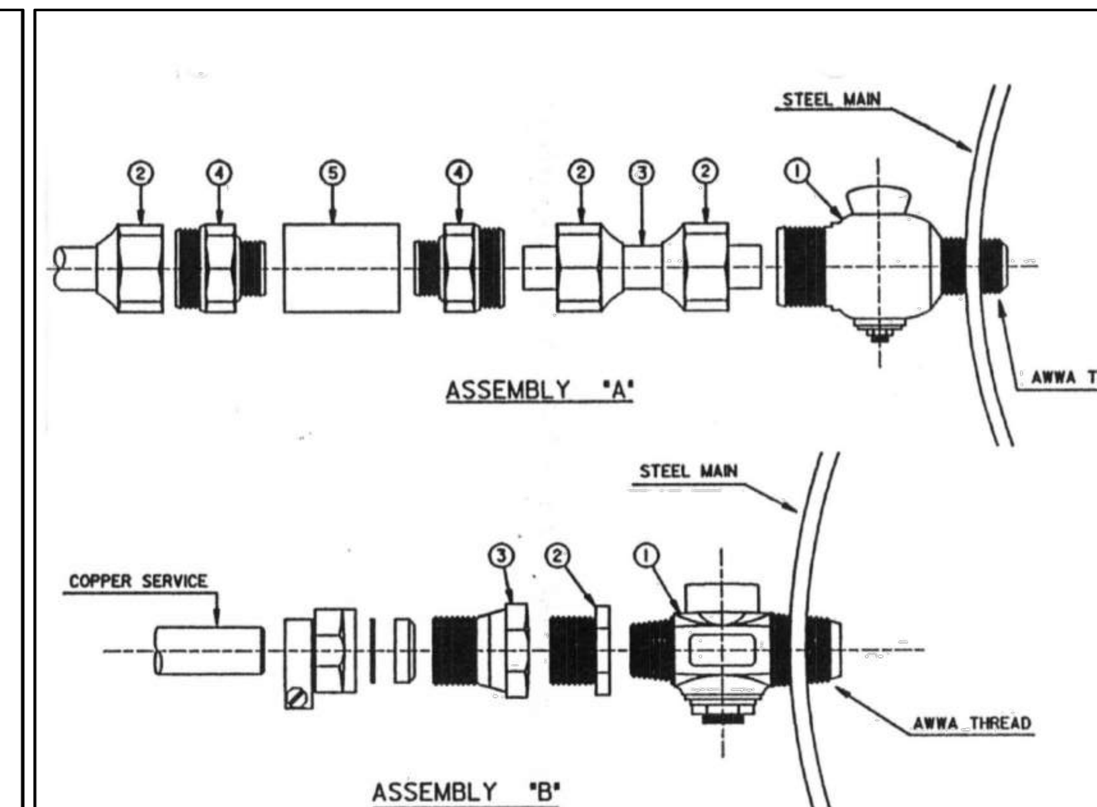
All dimensions are in millimetres unless otherwise shown.

FIGURE 5.10

middlesex centre — in the centre of it all

STANDARD INSTALLATION OF <50 mm WATER SERVICE CONNECTION AND LAYOUT DETAIL

DATE: 2017-04 | FIGURE 5.10



ASSEMBLY 'A'

1. Main stop (left open and burried)
2. Copper coupling nut (part of main stop or coupling)
3. Short piece of copper pipe
4. Copper to iron coupling (Mueller A-314 or equal)
5. Coupling - armour insulated

ASSEMBLY 'B'

1. Ford F400 or FB400 main stop - I.P. thread outlet (left open and barried
2. Nylon dielectric increasing bushing - F.I.P. threat inlet to MIP thread outlet
3. Ford C14 series decreasing coupling - F.I.P. thread inlet to compression outlet

NOTES:

1. Assembly 'A' or Assembly 'B' may be used as an alternative for 20mm and 25mm services, Cambridgt brass series 103 insulated main stop may be used.
