

RE: Kilworth West Heights Subdivision

To whom it may concern,

The three archaeological sites along Glendon Drive, including The Windy Site (AfHi-185), Location 1 (AfHi-372) and Location 2 (AfHi-373) have been subjected to Stage 4 Archaeological Mitigation under Professional License P344 issued to Derek Lincoln by the MHSTCI. They were reported to the MHSTCI under PIFs P344-0063-2015, P344-0158-2017, and P344-0159-2017. All three reports were accepted into the Provincial Register of Reports and none of the sites are considered to have further cultural heritage value or interest. No further work is required.

The portion of the Windy Site (AfHi-185) within park Block 553 of the proposed subdivision has not been touched and will be mitigated through avoidance and long-term protection. Recommendations made in the Stage 3 report by TMHC remain in place, although it has been firmly determined that the Municipality of Middlesex Center will take possession of the Blok 553 to implement long-term protection and avoidance strategies.

Please see attached acceptance letters from the MHSTCI.

Please do not hesitate the undersigned for clarification.

A handwritten signature in blue ink, appearing to read "Derek Lincoln", is written over a horizontal line.
